### Serbs step up crackdown in Kosovo

Nato allies yesterday accelerated plans to seal off Kosovo as Serb security forces intensified their crackdown on ethnic Albanian eparatists.

But a decision on Nato troop deployment could be delayed until the end of the month while the allies wait for military

Serb security forces yesterday said they had dealt "a heavy blow" to the Kosovo Liberation Army in a five-day operation in the south-west of Kosovo, the southern province of Serbia which is part of Yugoslavia. They said 40 people had been killed, including two Serb policemen. That would bring the death toll to more than 250 since March.

Nato speeds up plans to seal off province amid reports of 40 deaths and sharp rise in refugees arriving in Albania

Decani to rubble, according to an ethnic Albanian leader. News agencies cited Serbian sources who said they had shelled houses because they lacked the manpower to dislodge KLA fighters by other means.

In Brussels, ambassadors of the 16 Nato allies promised to speed up plans to train frontier guards in Albania and Macedonia, which border Kosovo. Nato contingency plans envisage a force that would deter Yugoslav and Serb forces from pursuing the KLA into Albania and Macedonia, and cut arms supply lines to the KLA. But the allies are seeking mili- ethnic Albanian majority,

Serb forces reduced the town of tary advice before deciding enraged by the government whether to send a significant Nato force into or near Kosovo.

The United Nations Commission for Refugees (UNHCR) said 2,000 refugees arrived in northern Albania overnight, bringing the number of refugees who fled there since last week to 3,700. Albania's ATA news agency said another 3,000 refugees were

approaching the border. Nato said it had received reports that "describe even more violence against civilians than has been in the press". They include reports of attacks on

repression. This backlash is having repercussions in Belgrade. the Serbian capital, where a local newspaper reported yesterday

The upsurge in fighting has undermined the US-sponsored talks between the Belgrade authorities and Ibrahim Rugova, the moderate leader of the ethnic Albanians, though they are expected to meet again tomorrow in Pristina, the capital of Kosovo. Albania, like the west, has backed autonomy for Rosovo

that 100 Belgrade policemen had

been sacked for refusing to be

drafted to fight in Kosovo.

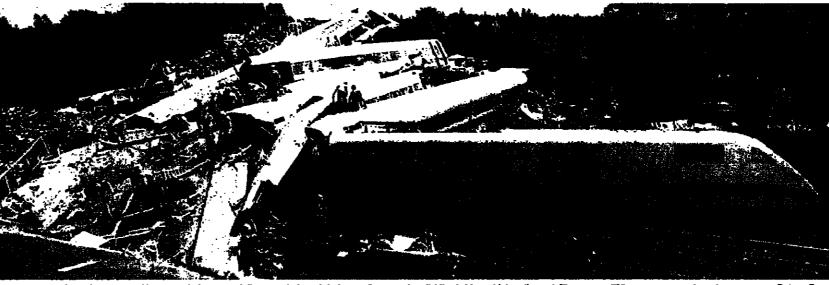

rather than independence, for fear that it might be destabilised by the emergence of a second ethnic Albanian state.

But, hit by the influx of refugees, the Albania government last night called for international intervention "to stop genocide" President Bill Clinton said last week the US "will not tolerate another Bosnia in Kosovo", and Tony Blair, UK prime minister, said yesterday Nato "could not afford to have a situation of disorder spreading" in the Balkans. However, a Nato official said that contingency plans for Nato troop deployment in Kosovo would not be ready in time for next week's meeting of alliance

Job guarantees for unions Greece's bank unions will decide today whether to accept the Socialist government's offer of job guarantees at Ionian Bank

and call off a three-week strike. Yannos Papantoniou, the economy minister, said all 4,200 jobs at Ionian would be guaranteed for two years after the bank is privatised. The bank's new owner would be obliged to apply public sector working practices, including lonian's scheme for early retirement.

The strike at Ionian appeared to be running out of steam, with employees gradually returning to work at branches around Athens.

State-owned Commercial Bank, which controls ionian, will seek approval at a shareholders' meeting next week for the sale of a 51 per cent stake through the Athens stock exchange. Tenders from private banks would be invited later

ionian's sale would mark the first full privatisation of a state-owned Greek bank under the Socialists' programme for banks and utilities. Share packages of around 35 per cent were sold last month in two small state banks, Macedonia-Thrace Bank and General Bank. Two more small state banks, Cretabank and Bank of Central Greece, are due to be privatised over the summer. Kerin Hope, Athens

#### TURKISH PREMIER

### Yilmaz to step down this year

Turkey's prime minister, Mesut Yilmaz, said yesterday he would resign by the end of this year to allow the formation of a caretaker administration ahead of early general elections to be held next spring.

Mr Yilmaz's announcement was widely expected after he began talks in April with a key opposition leader. Deniz Baykal, head of the centre-left People's Republican party. wants Mr Yilmaz to hand over to an interim government of independent technocrats before elections, in return for his party's support for economic reforms blocked in parliament. However, members of Mr Yilmaz's Motherland party warned they might not back the pact. Since taking office last July at the head of a three-party minority coalition, Mr Yilmaz has often promised early elections. John Barham, Ankara

### FOREIGN INVESTMENT

### Xerox builds Irish operations

Xerox, the US information technology company, is to create 2,200 jobs in Ireland in a IS200m (\$286m) investment setting up a manufacturing and technical support centre for its European operations.

The investment in Dublin and Dundalk, on the border with Northern Ireland, is one of the largest of recent years, and underlines ireland's continuing attraction as a location for US companies despite the skills shortages in some sectors. Mary Harney, the deputy prime minister, said 1,500 jobs would be created in Blanchardstown in Dublin and 700 in the

economically depressed north-east in Dundalk. Ms Harney said the Ulster peace agreement provided grounds for hoping for greater investment in the border counties, north and south. John Murray Brown, Dublin

### **DUTCH PETROL STATIONS**

### Brussels begins inquiry

The European Commission opened an investigation vesterday into FI 126m (\$64m) of state aid provided by the Dutch govemment to 624 petrol stations near the German border

The Dutch government says the subsidies, due to last until July 2000, fall below the threshold which triggers EU regulation. Each station will receive less than Ecu100,000 (\$111,000) throughout the duration of the plan. But the Commission sald the aid might affect cross-border competition.

The aid is meant to compensate the owners of petrol stations for the loss of business caused by a July 1997 increase in petrol taxes. Stations near the border are believed to have lost sales to nearby German petrol outlets.

The amount of the subsidy to each station is linked to the volume of sales and the distance from the border - the nearer the border, the higher the subsidy. Samer Iskandar, Brussels

### **CENTRAL BANK HEAD**

### Finnish coalition conflict

A political row has broken out in Finland over the appointment of a new head for the central bank, posing a threat to the ruling five-party coalition's cohesion. The conflict was triggered by the departure last week of

Sirkka Hämäläinen, Bank of Finland governor, after her appointment to the European Central Bank's executive board. Disagreement over her successor has turned into a stand-

off between the Social Democratic party, which leads the coalition, and the Conservative party, its chief partner, ahead of next year's general election. The dispute hinges on the refusal of the Conservatives, led by the finance minister, Sauli Niinisto, and the main opposi-

tion Centre party to sanction the appointment of a new member to the bank's board following Ms Hamalainen's move. The two parties say a fifth appointee is unnecessary as many of the bank's key monetary powers will shift to the Frankfurt-based ECB by virtue of Finland's participation in European economic and monetary union. Greg McIvor

monetary union." Where does the reform drive go from here? The one certainty is that, after all the efforts made to change it, the existing constitution has not a shred of legitimacy left. An attempt to resurrect the project was launched in parliament yesterday, when supporters of constitutional reform began a painstaking

RUSSIAN CRISIS PM GOES TO FRANCE AS SHARE PRICES RALLY

## Moscow to boost shareholders' rights

By Chrystia Freeland and John Thornhill in Moscow

Russian authorities vowed to crack down on bankrupt companies and beef up protection of shareholder rights yesterday, amid tentative signs that the national financial crisis was easing.

Russian share prices made sharp gains for the second day in a row, following last week's sharp falls, and treasury bill yields eased, prompting hopes that the financial storm which last week pushed interest rates to 150 per cent was abating. The RTS, the leading stock market index, rose almost

8.5 per cent. In a display of sang froid, Sergei Kiriyenko, prime minister, went ahead with a scheduled visit to France. saying the economy was robust enough to withstand his absence.

"I am not afraid of leaving. I am absolutely certain that the situation is under control," Mr Kirivenko said before leaving for Paris, the news agency Interfax said. "All members of the government and the central bank know their duties and are the next few weeks, invescoping with them wonder-

### **Territory** seeks to create iobs

By Jehn Ridding in Hong Kong

Hong Kong's government yesterday announced a package of measures to tackle rising unemployment in the territory, a further step in its hid to bolster confidence as the economy slides into

The announcement came as parties from across the , to counter the downturn include tax and rate cuts. government's signalled a growing political debate over economic management and the prospect of legislative opposition to the post-colonial administration.

"There is a rainstorm out there, the government should provide us with umbrellas," said Allen Lee. leader of the Liberal party. "If these policies should result in a budget deficit, we will support the budget defi-

Donald Tsang, financial secretary, said at least 100,000 jobs would be created over the coming 18 months. although more than 40,000 will come from infrastruc ture schemes announced before. Other measures include vocational training and education programmes and about 1,000 jobs in minor public works, such as grass-cutting and painting

Unemployment has secome the territory's main social concern, hitting a 14year high of 3.9 per cent in April. Economists predict the rate could double by the end of the year.

The jobs package comes just days after the government announced stimulus measures to support the property sector, increase liquidity in the banking system and support the tourist industry. Some of the measures have prompted concerns of government intervention in an attempt to revive the economy, which contracted by 2 per cent in the first quarter of the year. Mr Tsang rejects such claims, arguing that Hong Kong remains committed to "small government".

Yesterday's measures drew a mixed reaction from the investment community. Mark Konyn, director of Dresdner RCM Global Investors, said education and training measures were necssary to improve Hong Kong's competitiveness as a financial centre. But he said the pature of the downturn. resulting from a combination of falling consumer confidence, high interest rates and collapsing tourism, limited the government's powers. "It is unclear how effective the government can be," he said.

#### DRIVE FOR RELIABLE ECONOMIC REPORTING

### China threatens officials who 'doctor' statistics

The Chinese government yesterday told provincial officials to stop fieldling figures, threatening to punish those caught fudg-

ng China's notoriously unreliable statistics. Wen Jishao, the vice-premier, was punted in the People's Daily, mouthpiece of the ruling Communist party: "Some are cooking accounts to exaggerate their achievements. Some are practising deceit on their reports to cover up problems." China's state statistics are treated with scepticism by inter-

national economists, who assume that the legacy of the central planning era, when officials were required to make the regional figures fit the government's pre-determined annual targets, continues to distort economic reporting.

Suspicions that officials still tend to produce rosy statistics to satisfy higher government authorities have prompted many analysts to believe that China's gross domestic product tigures may exaggerate growth by as much as two percentage points. Officially, China's GDP grew at a 7.2 per cent rate in the first quarter of 1998, its slowest pace in several years.

Beijing is planning to establish supervisory bodies which will check up on fraud and punish irregularities among those officials who gather China's statistics, according to Mr Wen. He said false reporting "will seriously affect the quality of statistical figures and scientific macroeconomic decision-making, and hamper the healthy development of the national economy." China has set itself a target of 8 per cent economic growth this year. James Harding, Shanghai

### **MANILA TURNAROUND**

### Plan to guash Marcos jail term

The Philippine government, in a dramatic turnaround, said yesterday it had recommended the Supreme Court set aside a 12-year jail term against former First Lady Imelda Marcos and acquit her of corruption charges.

The solicitor general, Romeo de la Cruz, said the verdict by the anti-craft court that found the widow of former President Ferdinand Marcos guilty was wrong and should be over-

The case is one of scores against Mrs Marcos, whose husband's 20-year rule ended amid accusations of corruption and abuse of power. Mr de la Cruz said it was up to the Supreme Court to accept or reject his recommendation. The anti-graft court in 1993 found Mrs Marcos guilty of violating the anti-graft and corrupt practices law for leasing state property to a private foundation she headed under terms allegedly grossly unfair to the government.

The government has accused the Marcoses and their business associates of stealing up to \$5bn from the economy during their 20-year rule, Reuters, Manila

### **HUMAN RIGHTS COMMISSION**

### Jakarta counts riot toll

Indonesia's official human rights body said yesterday that 1,188 people were killed in rioting which hit the capital Jak-arta last month, more than double the death toil given by the military. The National Commission on Human Rights said thousands of shops, offices and vehicles were burned, women were raped and at least 101 people were injured. But it gave no details on the causes of the deaths or injuries. Indonesia's military said more than 500 people were killed in the May 12-15 riots, most of them locters who were trapped in burning buildings.

It said ethnic Chinese, who dominate Indonesia's economic life, bore the brunt of the losses in the riots. Government policy had created a socio-cultural wall between ethnic groups that was difficult to control, it said, adding that the sharp wealth gap between racial groups stifled attempts at integration. The commission pointed the finger of blame at the inadequate response of the security forces in controlling the riots once they had started. Reuters, Jakarta

TRADE RELATIONS

### Monsanto offer hits obstacle

Plans by Monsanto, the St Louis-based "tife sciences" group, to buy control of DeKalb Genetics, a leading agricultural genetics and hybrid seed corn company, have hit an obstacle with the US Department of Justice, which reviews US competition issues, asking for more information about the deal. The request will extend the period during which the two

companies are prohibited from closing the deal, although both said they would comply with the call as quickly as possible. Monsanto already owns 40 per cent of Dekalb, and has board representation at the Illinois-based company. The two groups have also collaborated on the commercialisation of agricultural products which are genetically engineered to either resist insect damage or tolerate certain herbicides. The controlling Roberts family decided earlier this year to self out of DeKalb, prompting a fierce auction. Nikki Tait, Chicago

#### Argentine warrants issued

An Argentine federal judge has signed international arrest warrants for four current or former International Business Machines officials sought for questioning in an alleged kickback scheme. IBM Argentina has been accused of paying bribes to win a \$249m contract in 1994 to install computers at state-owned Banco Nacion, the country's largest bank. The judge signed the warrants nearly a month after two former bank directors admitted having Swiss bank accounts containing cash they said they received for steering the con-

tract to IBM Argentina. IBM in the US relterated that the four officials were willing to testify before the judge in the US under the terms of a bilateral US-Argentine treaty. "They currently have no plans to go to Argentina," it added. The company described allegations that the officials knew of alleged wrongdoing at its Argentine subsidiary as "unsubstantiated". AP, Buenos Aires

#### **CENTRAL BANK ACTION**

### Colombian peso under siege

Speculation against the Colombian currency has intensified after Sunday's first round of the presidential election, prompting central bank action to restrict money supply and defend the peso. Local markets are concerned that Horacio Serpa, candidate of the governing Liberal party, could win office next month after his surprise narrow victory at the weekend. Most businesses favour Andres Pastrana, conservative candidate,

who earlier had been expected to score a resounding victory. The interest rate on overnight repurchase agreements or "repos" - used by the central bank to control money supply was increased on Tuesday by 10 percentage points to 62.15 per cent, bringing the cumulative increase over the last 10 days to 32 percentage points.

On the same day the bank spent \$18m buying pesos, bringing the total over the last ten days to \$300m. The situation is unlikely to improve much before the second round of elections on June 21, an analyst said. Adam Thomson and Richard Lapper, Bogotá

### **WEALTH EFFECT**

### US rich increase savings

Wealthy Americans have responded to the surging stock market of the last few years by increasing their savings and set-ting up charitable foundations, not by increasing their expenditure on luxury goods, according to a survey published today by US Trust, the US private bank.

The findings, part of a survey which has been conducted annually for the last six years, suggest that rising equity prices have not had the so-called "wealth effect" - in which consumption rises on the back of higher assets prices - which had been predicted by some economists. This in turn may alleviate fears that the current US economy rests on a "bub-

ble" created by inflated asset prices According to the US Trust, 87 per cent of the wealthiest Americans have left all or most of their gains in the market, mostly to ensure that they will have income in their retirement Charities were the biggest single source of expenditure when people cashed in investments. John Authers, New York

### TOBACCO SPONSORSHIP

### Two-year Canadian reprieve

Canada will ben all tobacco sponsorship in five years, but is giving events such as motor racing and jazz concerts a reprieve from restrictions scheduled to take effect later this year. The Liberal government was yesterday expected to introduce legislation allowing all current tobacco sponsorship to continue for the next two years, with tighter restrictions starting in 2000 and a complete advertising ban in 2003.

The changes follow pressure from sporting, arts and cultural groups which draw at least C\$60m (US\$41m) annually from tobacco sponsorships. Under original legislation, tobacco advertising would have been curtailed from October, imperial Tobacco, Canada's largest cigarette maker, had said it would cancel its C\$50m in sponsorship. Edward Alden, Toronto

Sara Lee

### Group donates \$100m in art

Sara Lee, the Chicago-based food and consumer products company, yesterday announced it was donating about 40 works of art, worth about \$100m, from its highly regarded art collection to 17 museums across the US. The largest single gift of about 12 works was donated to the local Chicago Art Institute. The company's collection focuses on impressionist paintings and sculptures. Several corporations in the US have sold private art collections recently, but Sara Lee claims that because of the tax deduction from the donation the financial benefits from a sale would not have been significantly greater.

### The biggest loser in Californian state voting spree never even had his name down on the ballot sheet

Governor Pete Wilson's ambition for a second shot at the presidential nomination received a big setback, says

**Christopher Parkes** he biggest loser in Tuesday's Californian voting was Governor Pete Wil-

Although his name was not on the ballot sheet, his ambitions for a second shot at the Republican presidential nomination took a hit when Proposition 226 which would have cut union contributions to the Democrats - went down in a storm of labour-funded

Mr Wilson had invested about \$1m from his own campaigning reserves behind the ballot initiative, which would have obliged employers and unions to seek employees' permission annually to withhold pay or contribute union dues to political campaigns.

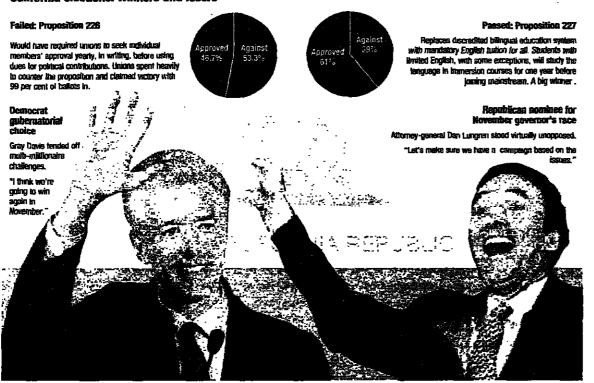

Although 226 built up an early lead, the unions threw an estimated \$20m into the fray and were rewarded with

a narrow victory. Sherry Bebitch Jeffe, a sage of the proposithe nation would have given new life to the stalled Republican compaign to rein in "big labour's" national political influence.

Failure, she predicted. would cause the national effort to stall, and set back Mr Wilson's hopes of higher

### **Boeing announces halt** to MD-11 production

Aerospace Correspondent

Boeing of the US said yesterday it had failed to find new customers for the McDonnell Douglas MD-11 aircraft and would stop manufacturing it in 2000, with the potential loss of nearly 4,000 jobs.

The announcement marks the virtual end of civil aircraft developed by McDonnell Douglas, once one of the world's biggest aircraft makers. When Boeing acquired McDonnell Douglas last year, it announced the phasing out of the MD-80 and MD-90 twinjet programmes. The new 100-seat MD-95, now renamed the Boeing 717, will be the only McDonnell Douglas commercial aircraft in production after 2000.

Boeing had hoped to continue manufacturing the MD-11 as a freighter but said this was not feasible. Ron Woodard, president of Boeing's commercial aircraft, culty meeting a steep ing the aircraft to so into division said: "Despite our

best marketing efforts, it Boeing is also considering became clear to us that there setting up production lines simply was not enough cus- at Long Beach to make spetomer interest in either the passenger or freight versions of this airplane to justify keeping the production line

By Michael Littlejobns at the UN in New York The head of the United Nations commission charged with eliminating frag's biological, chemical and missile

programmes vesterday briefed the Security Council on how much more has to be done by Baghdad before be can deciare compliance with UN demands and recommend ending sanctions. Richard Butler, a former ambassador of Australia.

**UN studies** 

secret data

went into the closed-door session armed with photographs taken by a U-2 highaititude reconnaissance aireraft that conducts regular flights over Iraq, and other classified data assembled by A principal aim

was to convince members Saddam was still playing cat and mouse

inspectors from his commission, known as Unscom, A principal aim was to convince members impatient over the slow progress of arms inspections, especially Russia and France, that President Saddam Hussein was still playing cat and mouse with the UN.

It was not the first time the council had studied U-2 pictures of Iraq. But these and other highly sensitive documents and data posed some risk for the UN because detailed intelligence information could be of immense value to Baghdad, enabling the circumvention of weapons inspections.

On the other hand, a convincing case by Mr Butler could persuade sceptical members that Unscom's policy was the only correct one. In a bid to pre-empt his appearance. Mohamed al- long-term surveillance.

on Iraq arms Sahaf, Iraqi foreign minister who has spent several days in New York for talks with sympathetic delegates, had a private meeting with council members during which he was said to have insisted that Baghdad had made "four final and complete disclosures" to Unscom and called for the lifting of the

eight-year sanctions regime. Sir John Weston. UK delegate, said he was unimpressed by the traqi presentation, which he termed a cynical exercise in obfuscation and an attempt to put Unscom in the dock. Bill Richardson, US delegate. said the Iraqis failed to back their arguments with documentation and were "not convincing.

But Yuri Fedotov, the Russian representative, insisted that Mr al-Sahaf had provided technical data that were "of relevance". The British delegate rejected the cil's ranks, noting that members had "at least a dozen times" expressed themselves unanimously on the Iraqi question and it was important to continue that solidar-

What seemed likely to emerge from yesterday's exercise was what has been dubbed a "road map" that Mr Butler may take to Baghdad, setting out what still needs to be done to ensure compliance.

He is due in the Iraqi capital next Thursday for his first visit since March, which came shortly after Kofi Annan, UN secretary general, averted the threat of US military action through an agreement with Mr Saddam. which permitted inspections of "sensitive sites" that Iraq had placed off-limits.

The International Atomic Energy Agency believes that any potential Iraqi nuclear threat has been eliminated and that in this area inspections could be superseded by

hey have been frustrated by cash demands, an inadequate judicial code to protect investments, and confusing layers of official negotiations. Local investors, dogged by punitive taxes, are also waiting to see whether a remarkable year of exchange rate stability and low inflation achieved by a newly rigorous central bank will survive the promised launch of a new currency, the Congolese franc, on June 30. They also await

results of commercial bank-

ing sector reforms which would renew prospects of loans.

Diplomats have started wondering what alternatives are lurking on the margins as Mr Kahila once did - that might be capable of halting the country's decline. They also ponder how the govern ment will organise elections when a population census. seen as a vital precursor to a poll, is far from ready.

The scale of the problem was illustrated recently by a local journalist who discovered, in a forgotten corner of the capital, an old man who refused to believe Mr Mobutu had been deposed and

buried. The president's entourage may well wonder whether two years is enough for Mr ity on the mass of jungle and isolated bush that was Zaire. Removing Mr Mobutu's face from the banknotes and shaking up the cabinet may not be enough.

### Eritrea in artillery battle

3 Soc Gen in the 1

Nominations of the

The simmering border dispute between Ethiopia and Eritren exploded into all-out worfare yesterday, as troops on either side of the contested frontier fired shells and mortar hombs at their former battlefield

Dashing hopes of a negotiated solution to the monthlong crisis in the Horn of eyewithesses reported that a full-scale artillery battle began at dawn at Zalambessa, a town at the heart of the triangle of territory being claimed by both countries.

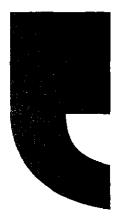

Ethiopia immediately accused Eritrea of starting the battle, saying its former northern province was trying to "hoodwink" the international community. Eritres responded by accusing Addis Ababa of planning an armed nvasion.

"This attack represents a new and dangerous escalation of the crisis," said the Eritrean Foreign Ministry.

"Unfortunately the Ethiopian government persists in its intransigent position of launching a full-scale war unless Eritrea 'withdraws unconditionally' from territories that are indisputably

Eritrean. Eritrea, which won independence in 1993, played a ignificant role in helping Ethiopia's guerrilla movement oust Mengistu Haile Mariam, the former Marxist dictator. Both countries appeared to enjoy warm ties until May 6, when a long-standing row over a still undefined mutual frontier turned violent.

Appalled by the prospect of two of its closest African allies going to war, the US has spent the last month trying to avert a full-scale confrontation, with Susan Rice, the assistant secretary of state for Africa, shuttling between the two capitals. With efforts showing few results. Rwanda has recently become involved in diplomatic efforts.

Our products are bought by people. Our products are made by people. Our business is managed by people.

### CHANNEL TUNNEL ROUTE DEPUTY PREMIER UNVEILS RESCUE PACKAGE 'FROM THE ASHES OF LCR'S COLLAPSE'

### Rapid rail link to France is given go-ahead

Ford and George Parker

The UK government yesterday gave the go-ahead for the construction of a £5.8bn (\$9.5bn) high-speed rail link from London to the Channel tunnel between England and

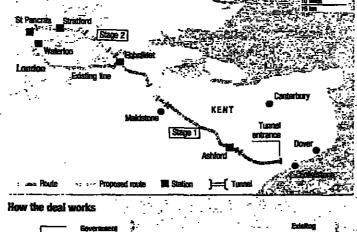

The 110km line will be built in two stages but should be completed by 2007, John Prescott, deputy prime minister and chief transport minister, told the House of Commons. This decision means that

the Eurostar trains between London, Paris and Brussels will be able to travel at speeds of up to 225kph through south-east England and, when both stages are complete, will cut 35 minutes off journey times.

"This is an agreement Pancras station, for an snatched from the ashes of LCR's collapse," Mr Prescott package that is good news for people travelling to and from mainland Europe."

LCR is to raise finance for the project, which will be 2010, Mr Prescott said. managed by Railtrack, the

#### **NEWS DIGEST**

#### **NUCLEAR WASTE**

### Scots plant says 'missing' uranium never existed

The troubled Dounreay nuclear complex in Scotland was trying yesterday to explain why a large quantity of highly enriched uranium which it admits is unaccounted for never existed. The loss of an estimated 170kg of uranium was recorded in 1969. It was thought to have occurred over 315 years between 1965 and 1968. The information on the material unaccounted for emerged in a published inventory of the contents of a shaft at Dounreay into which waste material was dumped in the 1960s and 1970s. Anti-Dounreay campaigners claimed the loss could be explained by the material having been transferred to the UK's nuclear weapons programme. But John McEwan, chief executive of the UK Atomic Energy Authority, said the disappearance of the material was simply due to a miscalculation. In the House of Commons, Tony Blair accused Alex Salmond, leader of the Scottish National party, of being "irresponsible and extreme" to alarm the public with allegations about the plant.

"As for allegations about the supposedly missing highlyenriched uranium, this allegation is actually based on a misinterpretation of 30-year-old records which are far from comolete by modern standards." James Buxton, Edinburgh

#### THE ECONOMY

### Sterling slows services' growth

The strength of stering is beginning to slow the growth of the UK's service sector, according to a report yesterday. But services continued to expand rapidly in May, the monthly survey of 600 purchasing managers by the Chartered Institute of Purchasing and Supply showed. "The rise in business activity during May reflected the continued strong growth in the amount of new business," the institute said. Buoyant domestic demand and increased spending on marketing boosted business in the companies surveyed. One in four companies reported a higher level of business last month than in April. The slight slowdown will be examined by members of the monetary policy committee of the Bank of England, the UK central bank, which today announces its latest decision on interest rates. Richard Adams and Andrew Bolger, London

#### Job Security

### Survey reports decrease

Job security has decreased over the past three years in a third of UK companies, according to the Confederation of British Industry, the employers' lobby. Initial results from a CBI survey of employment trends in 5,000 organisations also found working patterns are becoming more flexible, with 41 per cent of companies using more contract staff, 47 per cent more temporary staff and 38 per cent more flexible hours. Adair Turner, director-general of the CBI, said: "Flexible labour markets are the right policy response to the unemployment of the nineties and we need to scread that message to other countries across Europe. But the benefits of those flexible labour markets could be undermined by workforce insecurity, both through individual demotivation and through the political reaction that increased flexibility can provoke."

Reacting to the CBI survey, John Monks, general secretary of the Trades Union Congress, said too many people suffered from insecurity in their working lives. "This is due to too little on hire-and-fire," he said. Andrew Bolger, London

### CIVIL SERVICE

### Treasury chief to quit

Andrew Tumbuli, head of the Department for the Environment, Transport and the Regions is to become permanent secretary (top official) of the Treasury, the government machine's most owerful department, at the end of the month. He will replace Sir Terry Burns, whose departure brings to an end his uneasy relationship with Gordon Brown, the chancellor of the exchequer. Sir Terry joined the Treasury as chief economic adviser in 1980 and become its permanent secretary in 1991. Nigel Lawson, the former Conservative chancellor, admired Sir Terry's work at the London Business School in the 1970s and persuaded Sir Geoffrey Howe, then chancellor, to bring him In as the department's economic guru.

"The appointment proved a great success, tarnished only by his failures in the forecasting area in the late 1980s and early 1990s - the very area, ironically, where he had originally made his academic reputation," Lord Lawson said in his autobiography five years ago, Robert Chote, London

### **BSE INQUIRY**

### Mystery of epidemic threat

It is impossible to determine how many people might contract the human version of "mad cow disease", an epidemiologist told the BSE inquiry in London vesterday. He said the size of the epidemic could range from dozens to thousands. Simon Cousens, of the London School of Hygiene and Tropical Medicine, said this was because the incubation period of the disease - new vanant Creutzfeldt-Jakob disease - might be 30 years, or even more. The first victims of the disease appeared in 1995 but could have been infected 10 or more years earlier. So far 25 people have died of the disease. Another scientist said in a written statement that changes to the government veterinary service might make it much harder to recognise and Investigate BSE now. Dr Martin Jeffrey, who worked at the Central Veterinary Laboratory at the time the disease was identified in 1986, said: "It is possible that were BSE to occur in 1998 instead of in 1986 we may not have been able to detect it quite so readity." He blamed the "business ethos that is now used to run our

science". Maggie Urry, London

IT INTERVIEW GAVIN HOWE

internet The chief executive of Reed Elsevier's Technology Group

talks to **Richard** 

**Poynder** In his smart suit and In his smart suit and tidy office Gavin Howe does not look the archetypal "techie". Nor

Mr Howe began his working life as a journalist. After buying his first computer in 1977, however, he caught the technology bug. Soon he was publishing Computer Weekly. Shortly afterwards he became managing director of Reed's computer

publishing group. Now 43, Howe's career changed direction again last September, when he was appointed chief executive of Reed Elsevier Technology Group - a unit created to spearhead the company's electronic publishing plans.

Mr Howe's formidable task is to re-engineer the entire Reed Elsevier publishing operation, readying it for the age of the internet.

"The company," be states baldly, "faces huge structural changes." Reed Elsevier has 25,000 employees.

1,200 scientific journals, hundreds of business journals and magazines around the world - including the Butterworths and Tolley titles - as well as many busitravel ness and directories.

So how does a leading print publisher prepare for the networked future? Mr Howe says: "We are not completely hung up on the web. If you take our position as a provider of high value information to professionals, then the web can be a pretty poor delivery medium

Mr Howe has in mind the superior performance of Lexis-Nexis, the proprietary online service acquired by Reed Elsevier in 1994. But surely traditional online services are yesterday's technology?

Lexis-Nexis is criticised for being an old-fashioned service," concedes Mr Howe, "but the fact is that it can offer much more rapid and efficient access to information than anything yet available on the internet."

Nevertheless, the creation of RETG underlines Reed Elsevier's appreciation of the need to re-invent itself in response to the internet challenge. Headquartered in Massachusetts, RETG now employs 100 staff. Mr Howe is keen to point out that it is not a central IT support unit. "We are not a web factory; our role is to assist the businesses to build their own development teams, rather than doing all the work for them. So when a new project begins two or three people from a business unit will be seconded to RETG to assist in development.'

Consequently RETG is strongly focused on educating other parts of the group about the new technologies, and "evangelising". The aim is for the business units to acquire the expertise them-selves, so ironically, if RETG is successful, it will make itself redundant. So why have a central

create technology standards. "Instead of the company publications. spending many hundreds or thousands - of man years arguing about technology platforms, we provide a discipline for everyone to work unique combination of

within. By having a stan- strong brand and content dard we reduce the debate." says Mr Howe.

RETG's second primary role is to be a central learning hub. When part of the company acquires some new technological expertise RETG disseminates it around the whole organisation. "So we learn how to do something once only, and then apply that learning six times around the company.'

explains Mr Howe. Whatever the internet's

'Our role is to businesses to build their own teams'

not doubt its long-term importance. He is excited about the company's forthcoming web-based products. Elsevier Science, for instance, is making the full text of all its journals available over the web through a service called ScienceDirect, Mr Howe. while Reed Business Information is developing web function at all? Firstly, to sites around electronic insists the big changes versions of

limitations. Mr Howe does

By bolting content from Lexis-Nexis on to the back of the web services, Reed Elsevier believes it can offer a from a vertical print publication, plus depth and breadth from Lexis-Nexis.

To be.

Eventually the entire Lexis-Nexis service - a 20year archive of more than 1bn documents - will become available over the US subscribers to a new

web-based legal service called LIS Xchange have access to around 99 per cent of the Lexis-Nexis archive. In April a similar service for businesses was launched in the US - with European versions due for release in the near future. In the short-term, how-

\$743.44.4

ever, Mr Howe believes the best opportunities lie not with the internet itself but with the networking and software tools spawned by it. These are enabling publishers to deliver web-based information directly into high-speed networks, bypassing the internet's creaking infrastructure.

Already 20 per cent of Reed Elsevier's revenues come from electronic products. "Over the next three years we're looking to move that up to 30 per cent," says

But he does not expect print to disappear and print under way represent more a quiet revolution than a bloody coup.

This approach should give the business units time to acquire the necessary expertise themselves.

crude oil in development

Filter to refine

US researchers are developing a filter that can refine and purify crude oil. After further research, it might eventually take on some of the processing currently performed by petroleum refineries, according to its developers at the University of Southern California

The filter is made by heating a mixture of two metals to a very high temperature and spraying them through a nozzie to make a powder. The powder coats an inert which is then packed into a hollow

When crude oil passes through the filter, it "cracks" about one-fifth of the heavies components, upgrading them Into lighter components. The filter was also able to remove as much as 60 per cent of the sulphur in crude oil.

The so-called "interme filter would have certain advantages over refinerles since it does not require high temperatures and pressures operate. The device is being developed with funding from Klinair Environmenta Technologies of Dublin in University of Southern California: US, tel 2137404750; e-mail:

#### Modified peas to weed out weevils

catverte@usc.edu

A breed of genetically modified peas almost totally resistant to weevils has been developed. Normally, weevils can reduce pea yields by 25-30 per cent.

Scientists at CSIRO, the Australian research institute, Introduced a gene found in kidney beans, which are naturally resistant to weevil into the peas. The gene produces a protein that blocks the normal digestion of the seeds by weevil larvae. Otherwise, the genetically modified peas are identical to conventional peas in every

# To be, or not to be

Nigel Andrews admires a suicide mission about the meaning of life

Cherry, which won the Palme d'Or last year at Cannes, is like an inspired prank played on the road movie. There is no "road" in the sense of a developed surface going from A to B: the car-driver hero just winds and rewinds, mesmerically, around the hilltop dirt tracks above Teheran. And there is no "movie," if that suggests to you a purposive, logical drama travelling likewise from A to B. This Iranian film travels

more from alpha to omega from all our beginings to all our ends - via select points in the existential alphabet. "Mr Badíi" (Homayoun Ershadi) is looking for a man who will help his suicide project. For a generous reward, to be collected on mission's completion, the helper will either throw earth over Badii in his selfdug hillside grave or, if the planned sleeping pills have not worked, help him out of it to a new life.

This must be done at 6am the next day. So on this day – the film's day – the doleful death-seeker drives around candidates. He chats up a dreadfully funny and poigarbage-sifter. He takes a nervous soldier on a long drive. He is rebuffed by a alone would compel unbro-

Worker, who agrees to help only after waxing on about life's redemptive wonders and how even the firmest death wish can be defeated Abbas Kiarostami's Taste Of by birdsong, a sunrise or "the taste of cherry."

This film is so simple it is

miraculous. As in Close-Up and Through The Olive Trees, Kiarostami records natural sights and sounds as if he and we are hearing them for the first time. We almost are. Unlike Hollywood movies, where even in mid-desert people speak designer dialogue in a dub-bing-studio acoustic, and where birdsong and breezes are so synthesised they become the sonic equivalent of supermarket yoghurt, Taste Of Cherry has the vivid strangeness of the real and accidental.

Sometimes the dialogue is drowned out completely. In one scene you cup your ears when characters speak against a storm of earth-moving machines. But this scene also shows that nothing with Kiarostami is really accidental. To the hero seeking his 20 humble "shovelfuls of dirt" these shots of pouring, cataracting earth are like the sight of water to a thirst-maddened man. Like much of the movie, this sequence in love the dusty hills interviewing with annihilation is at once

The main actor's face

ALASTAIR MACAULAY

Not a single line feels familiar in

the new Young Vic production of Twelfth Night. Everything feels new, but also true. This most made that Comedy of Errors start speare's comedies becomes of all unlikely things and to mar-In one of the scenes I love best

in world drama, Sir Toby and Sir Andrew and Feste have been wassailing at midnight; Maria tries to hush them; and then Malvolio arrives. "My masters, are you mad?" Malvolio bere is Robert Bowman in a beautifully fresh and uncaricatured interpretation of the classic role, and he speaks to them with merest reason. He is not Malvolio the traditional sourpuss and acid censor, he is simply all sense, restraint, classical proportion. Yes, they are mad. Their behaviour, we well know, has been utter daffiness. We actually feel sorry for Malvolio, that he has no such madness in his heart.

This is wonderful. More so is the fact that, when next we see Malvolio, he discloses his own grain of madness: his vain ambition to marry his employer Olivia and to condescend grandly to her household. Here Bowman shows us Malvolio the closet sensualist. One hand lightly touches his cheek and almost licks it amid his fantasy; the other hand now and then flicks in lordly authority. But the fantasy is private. to proceed swiftly to almost

Malvolio in this scene is, as ever, absurd, vet Bowman also makes him intimate, even delectable.

The director is Tim Supple, and the production is a sequel to his 1996-97 production of The Comedy of Errors, the most beautifully revelatory British production of any Shakespeare play in the past three years. Touches of madness affectingly bittersweet of Shake- to resemble Hitchcock's Vertigo, utterly organic, natural, beguil- vellous effect; and here they light up the whole of Twelfth Night.

It is, in most cases, the madness of Eros. In her first soliloquy, Olivia (Sarah C. Cameron) wrestles briefly with her sudden attraction to Cesario, and then abandons herself to this craziness: "Well, let it be."

At every point, we feel the rational/irrational beating of the human heart. Christopher Saul is a Sir Toby of uncommon intelligence, Andy Williams is an unusually hearty Sir Andrew, and Dan Milne is a Feste who can suddenly quiet the revelry with singing of tender melancholy and can then build intoxicating music and romps. Sandy McDade is a sober, even severe Maria, whom love and fun always take by surprise. Likewise, Leo Wringer is a most temperate Orsino in whom love discloses a voluptuary. Melly Still's simple, elegant designs help to make the Cesario/Sebastian resemblance unusually persuasive. Supple allows the tempo to drop too much in the play's second half, and there are still a couple of mildly jarring moments when some actors show too much contrivance. But one wants him

Niffin Chandra Ganatra as Sebastian and Thusitha Jayasundera's Viola disguised as Cesario in Tim Supple's splendid new production

I have not yet mentioned either the worst or the best features of this most fresh and refreshing production. The worst, in two or three cases, is diction. The Young Vic is not a large theatre, and Sarah C. Cameron has been acting there and for Tim Supple for over two years. Yet she still fails to project several of her lines with adequate vocal support. Even Thusitha Javasundera - a Viola who brings an exceptionally low, handsome, and melodious voice to make her disguise as Cesario all the more convincingly seductive - sometimes lets her otherwise lovely elocution drop into inaudibility. The supreme virtue of the pro-

every other Shakespeare comedy. which conjures up a soundworld - poised somewhere between India and the eastern Mediterranean - of magic and mystery. Orsino's music really does have

"a dying fall". Even the three tiny notes with which Feste decorates the play's last line of song ("and we'll strive to please you every day") are perfect. Like so much here, they seem to grow naturally out of the play's fabric, I would return to hear them again - just as I would to watch Sir Andrew linger and behold, in a wordless, motionless pang of hushed jealousy, the lovelorn warmth with which Olivia greets her beloved Cesario. The matchless ensemble of this production is a lesson to all Lon**OPERA IN NEW YORK** 

### Rarities on the fringe

William Weaver reviews Salieri and Smetana

The Brooklyn Academy of Music, duction a line of male mimes able revival of his Falstaff suggratitude of New Yorkers over the past few years; and the recent visit of the Società dell'Opera Buffa from Milan will add to the year-old Italian troupe presented a worthwhile rarity, the Faistaff of Antonio Salieri, first performed in Vienna in 1799.

The received opinion of Salieri seems to be that he was a skilled composer but not a genius. Well, perhaps not; but the music of Falstaff is more than just agree able, and there are moments when the comedy takes on a darker hue, and the music probes below the attractive surface. Sensitively paced by the young conductor Alberto Veronesi, the equally youthful Orchestra Guido Cantelli was able to convey all the charm and elegance of the

Unfortunately, the staging by Beni Montresor, the company's founder-director, seemed at odds with the sense of the piece. Montresor designed pretty costumes, and a plain cube of a basic set, but then proceeded to make the actors perform in an incessant. jarring frenzy. Bardolf (the bass Filippo Bettoschi) and Pistol (the mime Gaddo Bagnoli) were never allowed to remain still for a

moment. From the Overture, Montresor made his intentions clear, he was not going to count on the efficacy of the music. During the intro-

### Revolution again

Services are triumphing over manufacturing in the same way that manufacturing overcame agriculture in 1851

By the year 2010, says Percy | (mean time between Barnevik, only 10 per cent of the US economy will be in manufacturing. The rest will If this prediction from

Europe's most influential sman is true. 2010 will be the moment at which the service economy will fully come into its own. As a historical turning point, it will stand alongside 1851, the year of the Great Exhibition in London's Crystal Palace. which marked the symbolic triumph of manufacturing over agriculture.

Since 1851, much of our way of thinking has assumed the primacy of manufacturing. Economic statistics, the corporate pecking order, the structure of international economic relations – all emphasise the industries that supply goods Services have been treated as a special case.

Take the case of trade. When the General Agreement on Tariffs and Trade was set up in 1948, it was aimed at easing the cross-border flow of goods. If was only in 1993 that a General Agreement on Trade in Services, Gats, was added.

Even that still leaves services a long way behind: the Gats is essentially a framework, to be filled in later. The first acrossthe board negotiations to start the detailed work of freeing trade in services are not due to start till 2000. By then, the most

service-oriented modern economies such as the US and parts of Europe will be well on the way to the shift in economic clout that Mr Barnevik's prediction suggests. What would it be like to live and work in a world in which services are not only dominant but seen to be so?

Economic statistics would change, for a start, MTBH

harder to capture in haircuts) would replace industrial production as the barometer of economic

activity. Capacity utilisation would be a much less helpful guide to potential inflation: the capacity of any service operation, whether a fast-food restaurant or a management consultancy, is more elastic than a factory But an economy in which service industries exercised

greater political clout would also run by different rules. This became clear at a neeting in Brussels earlier this week at which the European Commission listened to the views of service industry bosses on what Europe's negotiating priorities should be for the 2000 Gats talks.

A surprisingly small part of the business wishlist dealt with the question of market access - that is, the right to export services to country X or Y, the ostensible subject of Gats 2000. The issues business people stressed were subtler, more wide-ranging – and a lot

international trade negotiations: People. Services usually have to be delivered by a person. This means that service businesses have a quite different agenda of immigration issues compared with companies

that sell goods. In so far as manufacturers care about immigration policy, they are interested in access to permanent pools of labour (cheap or specially skilled). Service businesses want the ability to send their people in and out, for varying periods of time, without having to prove special laws do a poor job of dealing with this sort of

 Professional recognition Many services, particularly the more valuable ones, can only be provided by people who have obtained local qualifications, Sometimes these are not even consister within a country – as in the US market for legal services. Although the very largest

service companies may gain a competitive advantage from their ability to master the recognition labyrinth. medium-sized ones find it an almost insuperable barrier to cross-border activity. professional bodies to

recognise other countries' qualifications - in practice, not just in theory - is a laborious task, still a long way from completion even within the European Union. Getting it implemented around the world is likely to take decades.

 Competitive structure. Many services have historically been provided by state monopolies, in such areas as electricity, postal services or telecommunications. Even where these have been privatised, there is often a

legacy of dominant

suppliers, restrictions on foreign ownership, and immature regulation. Trade policy's normal weapon - a promise to treat foreign competitors on the same hasis as local ones - is of limited value, since all entrants are at a substantial disadvantage. Really free trade in services is likely to require further steps towards a global competition policy regime, something

few governments will relish. Those service businesses that are lightly regulated such as tourism or computer services – tend to confine their requests to a few general points (eg, on people) and otherwise ask mainly to be left alone. Those that have a long

legacy of state control or air transport - believe that true global competition requires huge efforts to disentangle the cat's cradle of laws, regulations and treaties that currently enmesh them.

Service businesses' share of gross national product will grow rapidly whether or not this effort is undertaken. Percy Barnevik's prediction will come true anyway. But let's hope policymakers take these issues seriously, and start coming to terms with a world driven by services, not manufacturing. Without that shift of approach, 2010 will be even more disconcerting than 1851 must have been.

### Considering the options

Nikki Tait on how the US futures industry is reacting to the introduction of electronic daytime trading in other financial centres

Hue and cry: Chicago Board of Trade continues to use open ou

in the US," says Marc Breillout, head of FIMAT Futures "The pace of change is (USA), one of the largest futures brokers.

Pat Arbor, chairman of the Board of Trade, is even blunter. "I think people are rushing to declare open outcry to be dead, Like Mark Twain, I think reports of its death are

The first big difference between Europe and the US is that there is no catalyst compelling the Chicago exchanges to make an imme diate switch to screen-based trading. The issue of monetary union, which threatens to eradicate the local monopolies many European exchanges have held, does not arise. And there is no equivalent of the Deutsche Terminbörse, the allelectronic German exchange that last month overtook Liffe in the total of turnover

in all its contracts.

Perhaps the closest US parallel to DTB is a new electronic exchange proposed by Cantor Fitzgerald, the Manhattan-based brokerdealer, and the smaller New York Cotton Exchange. The latter wants to trade Treasury bond futures, and could undercut the Board of Trade's interest rate futures business. The Cantor exchange has yet to clear doesn't have to go that way regulatory hurdles.

The second important difference is the strength and depth of the "local" population at the Chicago exchanges. These are the independent traders, who buy and sell for their own account. They inject valuable liquidity into the market and their role would be difficult to replicate electronically with present technology. Locals are a far more significant part of the Chicago exchanges, both in terms of the institutions' membership and trading voi-

ume, than at the SFE, Matif or even Liffe. As Mr Breillout points out end-customers want lowest transaction costs, but they also want liquidity. That is precisely what locals offer, particularly in difficult trading conditions. "Open outcry for me has some advantages. The disadvantage is the cost," he says. "But the efficiency of open outcry, especially in fast markets, is

Meanwhile, other industry participants have yet to be persuaded that any screenbased system (using current technology) will work as well in complex contracts. Some contracts would be very hard to put on an electronic market, such as the eurodollar, with all its intricacies," says Jim Gary, agree

giobal futures manager at ABN-Amro.

WANCIAL FINE

The Bulkania Maria

Not for sale

Italy's way

The position of the two big exchanges is publicly to sup-port the status que for the time being, but to be prepared for screen-based trading should a catalyst

emerge: This process is clearest at the CME, where McKinsey, the consultancy firm, is reviewing all aspects of the exchange's business, from ownership structure to the

conduct of trading. At the same time, the CME has begun to introduce some contracts that are traded either electronically (the new "turn rate" futures), or via a combination of open outery and screens (the "E-mini" stock index contract). Mr Gordon of CME says others might be considered in the coming months and concedes the possibility of moving more illiquid contracts onscreen

The Board of Trade, too. olstered its electronic capabilities via its alliance with Eurex, the European exchange resulting from the merger of DTB and the Swiss Soffex later this year. Mr Arbor still takes a firmer line against "hybrid" trading of contracts, but there are efforts to bring more electronic "clerking" to the trading floor, so that orders flow in electronically but are then

executed through the pits. The two exchanges have buried their traditional rivalry sufficiently to agree a common clearing system deal that could clip millions of dollars from members' costs. Agreement was reached in principle in March. The final package is due to be completed this bers for approval.

Whether these measures will amount to anything more than a stop-gap on the road to fully fledged screenbased trading remains to be seen. Mr Gary, for one, is uncertain whether hybrid markets are a long-term solution. He says be is intrigued by them, but does not have an opinion about whether they are a good

thing. But he says: "I think the changes our industry is going to go through in the next 24 months will be as dramatic and fascinating as at any other period in its history." On that score, both exchanges would probably

What do the Army, lammie Dodgers, VW and Polaroid have in common?

> Announcing entrants to the 1998 IPA Advertising Effectiveness Awards

The common thread that links all these powerful brands (as well as many others) is effective advertising. All are entrants to the 10th biennial IPA Advertising Effectiveness Awards, the only advertising award scheme which exists to demonstrate that advertising is both a serious commercial investment, and a contributor to profit, not just a cost. Entries take the form of 4,000 - 5,000 word cases, and require quantification of advertising effect.

Though it has been battered by mother nature and bedevilled by severe structural unemployment, the south of Italy will rise again,

Fire

In Calabria, Gicia Tauro has emerged as Europe's fifth most active port because its mayor, Aldo Alessio, provided the political will that enabled Contship Italia to transform a "cathedral in the desert" into an oasis of entrepreneurship. Elsewhere in the region,

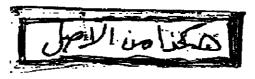

from the health and ski resorts of Camigliatello to the international airport of Lamezia Terme, the time is ripe for significant homegrown enterprises to take root. Start-ups in Puglia, Campania and Sicily are already blazing new trails in financial services, manufacturing and tourism. Indeed, the Mezzogiorno's rate of growth in new companies is double the national average.

Romano Prodi's government could further accelerate private investment in the south by providing tax incentives for business incubators that nurture high tech firms. This would allow venture canitalists to convert emerging technologies ucts and services.

As a result, new and diversified industries would create a plethora of private sector jobs. And an Italian economy bolstered by a revitalised, entrepreneurial Mezzogiorno would help put the Mediterranean basin on a par with Silicon Valley.

### The southern Balkan war

During the Bosnian war, the UK needed, and quickly. Nato has and France argued that their started talking about deploying United Nations arms embargo, were preventing the conflict from ading to the southern Balkans where it could do even more damage: if Kosovo were to ignite, Macedonia would soon disintegrate. War might then engulf the whole region, bringing in not only Albania but possibly Greece and Turkey, on opposite sides.

Now, nearly three years after the war in Bosnia ended, the war in Kosovo has begun. Regrettably, the great powers are confronting it with much the same fatal indecision that they showed for so long in Bosnia, and before that in Croatia.

The villain is still Slobodan Milosevic, now president of the rump federal Yugoslavia. As ever, he is seeking to extricate himself from his domestic problems (this time with Montenegro) by playing the nationalist card.

Exploiting Serb fears in Kosovo was what brought him to power in the first place. Now he is doing it again, with an all-out offensive that is driving thousands of ethnic Albanians across the border. And once again he has wrongfooted his foreign critics, striking just when, by agreeing to talks with moderate Albanian leaders, he had persuaded the international Contact Group to lift an

investment ban.

troops in the country, and the troops, but on the borders rather than where the actual fighting is. As was so long the case in Bos-nia, it has succeeded mainly in frightening itself, by listing the

logistical problems. What eventually worked in Bosnia was full-scale economic sanctions combined with intensive air strikes against Serb apons dumps and supply lines. Similar measures should be threatened now.

Once again, Russia is delaying such decisions by threatening to use its veto in the UN Security Council. Yet at the very same moment Russia is expecting western support to save it from a collapse of investor confidence. It should be told firmly that, if it insists on treating Mr Milosevic as its protegé, it will be held responsible for his behaviour.

The optimum outcome for the rest of the region would be the restoration of Kosovo's autonomy perhaps giving it equal status with Serbia and Montenegro in a reformed federation. But the west has to face the prospect that the outcome may be independence for Kosovo, since that is what 90 per cent of the population claims to want. If that is to come, it must be carefully negotiated and managed. Premature recognition could all too easily precipitate war in Macedonia, as that of Croatia did in Bosnia.

s governments of the leading industrial countries discuss pouring in more money to stave off financial crisis in Russia, worries mount that big international bailouts are encouraging reckless behaviour by foreign investors and bankers

A \$50hn international effort for Mexico in 1995 was followed by bailouts last year totalling more than \$100bn for Thailand, Indonesia and South Korea. Now the US says it will back proposals to expand a \$10bn International Monetary Fund package for Rus-

Much of this public money has gone to pay off private investors, short-term funds whose behaviour helped precipitate the crises in the first place. "The biggest sinners are those who can exit the fastest," says Amar Bhattacharva, economic adviser to the World Bank.

"We want to see more fear in the international financial system," says a senior policymaker in one Group of Seven govern-ment who believes investors would lend more wisely if they stood to swallow more of any resulting losses.

The problem is encapsulated in the phrase "moral hazard", a concept that has been around at least sìnce Adam Smith. He observed in The Wealth of Nations that managers of companies they did not own would always be more negligent than owners. Economists define it as the actions of those seeking to maximise their own utility to the detriment of others, where they do not bear the full consequences of those actions.

The case against bailouts is put by Charles Calomiris, professor of finance and economics at the Columbia Business School. Writing in the journal of the libertarian Cato Institute, he asks: "What will foreign banks learn from the 1994-95 Mexican crisis, or the recent Asian crisis? I fear they are learning that they can lend without fear of default because of the implicit protection of the IMF and the US Treasury.

The case for the defence is put by Ricardo Hausmann, chief rather than a combination of economist of the Inter-American Development Bank. He says the argument that the bailout of low-risk economies. A significant Mexico helped foment Asia's cri-"holds no water whatsoever". lending to companies, that "I don't know any argument unlikely to be bailed out.

that has gained so much credence," says Mr Hausmann. "For a lot of people the words moral hazard' are like a nursery rhyme: learned as kids and they can't forget the melody."

So what does the evidence

For the moment the constitutional reform process is dead in the water. The best hope must be that it can recommence after a referendum on electoral reform next year. Without a stronger framework, there is a risk that persuade the Italian public to Italian fiscal policy could become

Marriages of convenience Shareholders don't like it and

analysts hate it, but it looks like there's a real vocue for power-sharing at the top of big American companies. The latest hook-up is between

John Stafford, the aggressive lawyer who runs American Home Products, and Monsanto's Robert Shapiro, a New Age management guru, who will be co-chief executives of the merged company. This week has also seen Hank Paulson elevated to co-chief executive and co-chairman with jon Corzine at investment bank

Goldman Sachs. Other recently-fashioned duets include Sandy Weill, the dynamic entrepreneur who built Travelers, and the more cerebral John Reed of Citicorp, who will jointly head the new Citigroup.

Well has assured shareholders

that he has had blenty of practice in being told what to do - not at Travelers, you understand, but in his 43 years of marriage. Indeed, his faith in power-sharing s such that he recently appointed Deryck Maughan, the Brit who ren Salomon Brothers, and Jamie Dimon, who already controlled

co-bosses of Salomon Smith Of course these corporate manteges tend to be made not in heaven but in the course of merger. negotiations - though Goldman

Travelers' Smith Barney, as

still for the moment a partnership, has a long tradition of power sharing.

investment bankers privately admit that fear of losing job and status, rather than innate flaws in the merger plan, is the most common stumbling block in negotiations: after all, the rewards of the current merger boom are substantial for those who stick

around. There will be lots of eyes watching how these arranged marriages fare. Observer will be particularly interested to see whether their success rate is better or worse than that of US civil marriages, 50 per cent of which now end in divorce.

### **Water course**

Malaysian prime minister Mahathir Mohamad isn't usually listed among the most liberal of world leaders, and the upheavals in neighbouring Indonesia don't seem to have encouraged him to open the doors to popular protest.

Yesterday, a consumer rights group was to have met Kuala Lumpur residents to discuss a water shortage that has left 2m people with no regular supply - If you're lucky, the tap runs every second day, The authorities aren't doing much about the antiquated water system, and say rationing could get worse before it ends altogether – just in time for Commonwealth Games in September.

The unworthy thought has

crossed some minds that the authorities are hoarding water to The idea of this being said out loud proved too much for the government, which banned the meeting "for security reasons". The opposition says two other public

gatherings have been banned in

the last few days. Even before the indonesian brouhaha, the approach of the Commonwealth games was increasing official tetchiness. For example, the authorities have told television stations their licences will be revoked if they use the word "haze" - though they haven't specified an alternative way of describing the intermittent thick smog from forest fires in Indonesia

in the face of government paranola, the four main opposition parties have signed a declaration that Malaysia was heading towards a "police state". Stopping opposition squabbling can't have been the result Mahathir had in

### In need of Big Brother

The dreaded C words have come back to baunt emerging markets - currencies and contagion. The recent plunge in the rand and the rouble has been a reminder that currencies remain critical in emerging markets. They may be symptoms of other problems, but quickly become important causal factors themselves. Contagion. meanwhile, is not popular in polite company. But the downward march of emerging markets across the board in recent weeks shows it to be alive and well.

The reality is that as cross-border flows into emerging markets increase, so correlation between markets rises. It matters less now where the trigger event is. Fears of higher US rates, weakness in Japan, tension in the sub-continent - all reverberate globally. And when the backdrop is unsettled, contagion trumps domestic fundamentals. The upshot is that 1998 is proving a further annus horribilis for emerging markets. The full depths of Asia's difficulties become ever more apparent and Latin America continues to

Not even the one beacon of hone emerging Europe, Middle East and Africa has escaped the latest bout of jitters. But applying the Big Brother rule - that emerging markets often reflect the health of their nearby G7 neighbours - it still looks the best bet over the coming year. Eastern Europe looks well placed to bask in the warm glow of economic recovery in

#### Telecoms equipment

Looking for the real winners in the communications revolution? Try the telecoms equipment providers which make the arcane switches and circuits at the heart of today's new-fangled networks. Ciena. whose gear allows long-distance operators hugely to boost the capacity of their fibreoptic wires, was yesterday valued at \$7.1bn in a takeover. Not bad for a com-

pany with sales of \$370m last year. Granted, Ciena is growing at nearly 50 per cent a year and is already very profitable. But Tellabs, the buyer, can afford a price of 35 times estimated 1999 earnings only because it is paying with its own shares - which are trading at a similarly elevated multiple. Nor is this limited to

and is now rated just as highly. Can Wall Street's enthusiasm be justified? Certainly, as voice, video and data traffic converges, operators are spending billions overhauling old networks and building new ones - Sprint being this week's example.

But new technology is also bringing fresh competition: Sprint has turned to Cisco, a computer networking group, to supply much of its new kit. The real worry, however, is that as the US forges ahead. European suppliers such as Siemens and Alcatel, which are still largely tied to staid national phone companies, will fall further and further behind.

#### Channel tunnel rail link

From its deathbed in January, London & Continental Railways has emerged, blinking, into daylight. However, its revival raises many questions - hardly surprising given the opacity of the process. The taxpayer would have been better served if construction of the link had been re-tendered. The direct additional subsidy LCR will receive from the government, of £140m-£360m, may seem much lower than the £1.2bn it was demanding four months ago. But the implicit value of having government guarantees behind £3.8bn of LCR

debt more than makes up the difference. In return for this guarantee, the government has scored political points by reducing the concession's length from 999 years young start-ups. Lucent, the industry's to less than 90. And it will also take 35 per shareholders emerge, that day will draw gorilla, has seen its stock quintuple since cent of post-2020 pre-tax profits, which it

optimistically values at £200m. Ali in all, while Railtrack is assuming some construction risk, the cost of driving down the Channel tunnel rail link's cost of cap ital is being borne largely by the tax-

For Railtrack, the negotiations have been a success. By getting the project broken up into two phases, it has avoided having to take the whole link on board in one go, while keeping an option on the second phase. But perhaps more positive for Railtrack's shares has been the expec-tation that it will be well placed to drive a hard bargain at its forthcoming regula-

#### Japanese accounting

News that Yamaichl's auditors are being sued by disgruntled shareholders is hardly surprising. They signed off on accounts which were later revealed to have hidden Y260bn of losses. But this is more than just a little local difficulty. If it serves as a prod to improve Japanese accountancy practices, it will make Japan a much more friendly environment for

foreign investors. Right now, only a small number of the largest companies adhere to international accounting standards. Beyond these few dozen companies, the picture becomes much murkier. Cosy relations between companies and auditors impugn the veracity of audited figures. Consolidated accounting is still scarce and cash-flow statements are unaudited. Fortunately. Japan's 'big bang' will usher in reforms which should help address these concerns.

Short-term, this could see some nasty gremlins emerging from the woodwork. Longer term, though, the increased transparency should provide the confidence to underpin higher ratings. Indeed, this was clearly a key factor which helped support valuations of the so called "nifty" stocks last year while all around them were dis-

For global accountancy firms, meanwhile, these developments are also welcome. Current tie-ups with Japanese firms fall far short of providing an assurance of uniform global standards. But if the government does its bit, and more assertive

## Yamaichi shareholders sue auditors for misconduct

By Gillian Tett in Tokyo and Jim Kelly in London

The auditors of Yamaichi Securities, the Japanese broker which collapsed last November, are being sued by shareholders for misconduct. The suit is the first fully-fledged legal action taken against an auditing

firm in Japan. The action against Chuo Audit Corporation, part of the Coopers & Lybrand international network. could prompt reforms in accounting procedures in Japan which have been heavily criticised by western investors.

Forty shareholders in Osaka are suing the Yamaichi management and Chuo Audit for damages over losses incurred as a result of the collapse of the Yamaichi share

Hiroshi Nakaji, head of Nakaji chairman of Japan's Accountancy Society, said: "This is new in Janan. It will force the accountancy profession to act more rigorously in the

verge of completing a \$13bn merger not fully repay its Y43m subordiwith Price Waterhouse designed to provide multinational clients with a

seamless global service". But yesterday Coopers said Chuo Audit Corporation was a separate refused to comment. legal entity and that any liability would be ring-fenced from its international network and Price Water house. No legal action is planned

against Coopers. Several of the Big Six audit firms have been worried for some time about their network partners in Japan and have been privately seeking to improve standards in both accounting and auditing.

The collapse of Yamaichi has caused particular controversy in Japan because the broker was holding Y260bn (\$1.86bn) in hidden losses. These had been concealed from investors in the past by shuf-Audit Corporation and incoming fling them between accounts in a practice known as "tobashi".

After the collapse, Japan's Ministry of Finance insisted the company was still solvent.

However, this week Yamaichi admitted that liabilities exceeded See Lex

Coopers & Lybrand which is on the assets by Y22.5bn and said it could nated loans from Japanese insurance companies.

The ministry denies it knew about these hidden losses. Chuo yesterday

Any potential damages awarded are likely to be small. And some Jananese lawvers suspect the case will fail because defendants will

claim the ministry knew about the

But lawyers argue the case could set a very important precedent. A shareholder in a failed housing loan company is now also trying to sue accountants. One Japanese lawyer says: "Until now the accountants felt responsible to no one. This could

change things." Japanese accountants have traditionally had very close relationships with the companies they audit. In contrast to countries such as the US. they are allowed to audit the same company for decades. However, Mr Nakaji said he now plans to introduce a live-year time limit.

### Arthur Andersen shelves deal with City of London law firm

Arthur Andersen, the Big Six accountancy firm, yesterday suffered a setback in its ambitions to construct a global legal network when it pulled out of a planned takeover of

Wilde Sapte, a City of London law

The accountant, which has already made significant acquisitions in Europe, indicated yesterday that high profile departures from the law firm since the deal was announced in March meant the make-up of the

business it wanted had changed. The collapse of the deal casts doubt on the ability of any of the so-called Big Six accountancy firms to realise their strategies of building global network of law firms with strong links in London and New York. "Frankly, it's a nightmare," said a senior partner at a Big Six firm. "In London the four or five top legal firms think they can go it alone and don't want a deal. The rest can't

seem to deliver their partners." The collapse of the deal is a blow

to Andersen. The agreement with Jacovides, had badly dented the Wilde Sapte had ended an 18-month search for a leading City banking and financial law practice to join its growing legal network of 74 offices

in 31 countries. Nick Prentice, Andersen's head of tax and legal practice, said he was sorry the agreement had foundered. but the search would go on for another City law firm. "The strategy is right and we are still aiming to build a strong international law network offering English law advice." he said.

The deal, which involved Wilde Sapte merging with Andersen's UK law firms - Garretts and Dundas & Wilson - on September 1, would have created a firm of 750 lawyers with a turnover of £100m (\$164m). making it the UK's sixth biggest practice.

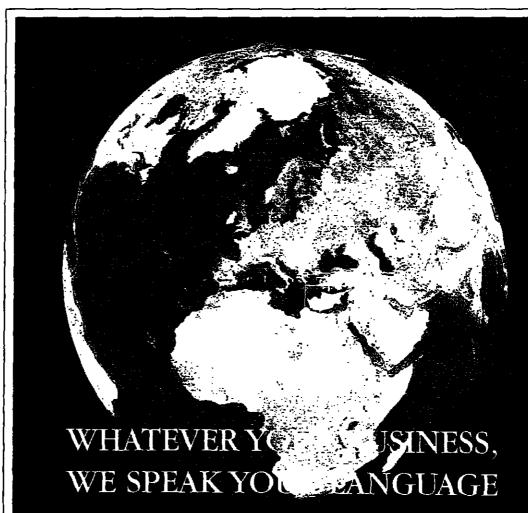

But the departure of Graham Smith, former head of leasing at Wilde Sapte, to rivals Allen & Overy, the international law firm, closely followed by leading asset finance partners David Smith and Mario City law firm.

business case for doing the deal. Mr Smith and Mr Jacovides voted in favour of joining Andersen and then resigned. According to one lawyer close to the deal. Andersen began to fear a repetition of events following its takeover of SG Archibald in France when several of the Paris law firm's best lawyers walked away. It is also understood Wilde Sapte's

Paris office voted against the deal. The law firm's future could now be under threat. It has lost several of its leading lawyers in recent years 🔾 and had made no secret of the fact that it was looking for a merger.

One senior partner of another City law firm said: "It's going to be an extraordinarily tough time for Wilde Sapte and I suspect the firm may not

survive." Lawyers also said that having pulled out of talks with Simmons & Simmons last year and now having called off the deal with Wilde Sapte, Andersen had torpedoed any chance of serious discussions with any other

dum, Indonesia agreed to sell 49 per cent of Krakatau to Ispat with a possibility of selling 51 per cent if the price was satisfactory. Ispat is due to complete the deal by the end But Mr Mangoensoewargo

said the company had been working with its advisers Nomura International on a different plan. This included finding a strategic partner in a deal involving a share issue and the government retaining a 55 per cent stake. Executives from Nomura were not avail-

### Russia launches \$1.25bn bond issue

Russia took the international bond markets by surprise yesterday with a \$1.25bn offering priced at almost double the premium it paid when it last visited the markets this year.

Proceeds from the bond the country's fifth on the international markets since it made are expected to contribute to the defence of the embattled rouble in the absence of any extra assistance from the International Monetary Fund.

Senior bankers in London and New York said they were caught unawares by the timing of the issue in the light of the battering Rossis has taken on the foreign exchange markets in the past two weeks.

Rumours in the market had Sachs, was priced to yield 650 interest payments suggested Russia was planning to take out a large syndicated loan from a consortium of Gerrouble. In addition, Russia was understood to be requesting official assistance from the group of seven leading industrialised countries. Issuing a

bond, however, was considered

"This is a large bond issue, but it is not large enough to shore up Russia's foreign exchange reserves very effectively," said one bond official in London yesterday. "At the same time it has sharply raised the premium at which Russia borrows dollars from the bond markets."

Yesterday's bond, which was lead managed by Goldman for Russia to keep up on the of old into new paper.

FORESTRY MACHINERY

# or Europe, Valmet operating profits slip 4.7% to FM302m

Valmet, the Finnish forestry machinery and engineering group, yesterday blamed mixed demand for paper and board machinery for a 4.7 per cent fall in profits in the first four months of the year. The company saw operating profits decline from FM317m to FM302m (\$55.8m), in spite of a rise in sales from FM3.76bn to FM4.03bn in the period ended April 30. Although pulp and paper prices stabilised in the four months, Valmet said paper manufacturers remained cautious about making investment decisions and were still willing to

At the pre-tax level, however, profits rose from FM347m to FM415m, mainly because of a FM104m gain on dividends received and the sale of non-core shareholdings. That helped lift earnings per share by more than 22 per cent to FM3.96.

SWEDEN

### Green light for euro listings

The Stockholm stock exchange yesterday gave the go-shead for the country's big multinational companies to list shares in euros at the start of European aconomic and monetary union (Emu) next vear.

Aithough Sweden is one of four European Union states which have decided to remain outside the single currency from its inception, the bourse said it would offer listing and

trading in the euro from January 4 next year. Among the companies balieved to be preparing to switch their listing from kronor to euros are Skandinaviska Enskilda Banken and MeritaNordbanken, the commercial banks, and several of the country's big forestry groups.

Leif Vindevag, a senior stock exchange official, said many of Sweden's largest quoted groups were subject to heavy cross-border stock trading and had a high proportion of foreign shareholders. It would make compelling commercial sense for many of them to switch to a euro listing. Greg McIvor, Stockholm

### Dublin bids to stem overseas drift of its technology stocks

Starved of new issues, Ireland hopes to encourage more companies to seek dual listings, writes John Murray Brown

rish technology companies essentially doing is betting have never needed persua- on the future," says Mr Keatsion regarding the merits inge.

Much to the chagrin of the Irish stock exchange authorities, the Washington-based electronic exchange has lured away many a promising Irish company.
That may be changing.

In a bid to encourage domestic listings, a number of Dublin brokers are taking on technology analysts - a breed unheard of a year ago. Investment Bank of Ireland, Bank of Ireland's corporate finance arm, has gone one step further and

announced a formal link with US investment company Donaldson Lufkin & Jenrette in the hope of tap-ping into the demand for dual listing services. Richard Keatinge, IBI

managing director, estimates that up to 12 Irish-owned technology companies could seek a dual listing over the next two years.
With Nasdaq handling about 400 initial public offerings a year, this looks like

small beer, but for the Dublin exchange, starved of new issues, this could provide a catalyst for growth. With its deeper research base, greater familiarity of

the investment community, and less risk-averse investors, Nasdaq remains a key market for any young technology-based company, hungry for investment capital. and ready to float equity. More importantly, the ratings enjoyed by US technol-

ogy stocks dwarf those on European markets. With 80 per cent of our products sold in the US, from a customer point of view, I don't think there is any question what market we should be on," says Bill McCabe, chairman and founder of CBT Technolo-

gies, a leading provider of interactive education software with around 250 titles used by over 1,000 leading computer companies. CBT, which was the first irish technology company to list on Nasdaq, is followed

by seven leading US investment banks. But on Nasdaq, CBT is one of 6,000 companies. Brokers point out that

were it to list on the Dublin exchange it would account for 25 per cent of the Irish index. "We're thinking about it all the time," says Mr

McCabe coyly.

IBI believes there is now a strong case for a dual listing for new companies seeking to tap the equity markets. The Nasdaq quotation is

part of the strategy. "In the US they tend to rate technology companies on turnover. What you're

This is important for companies which may still be in the research phase. But Enrique Curran, analyst with NCB, Ulster Bank's broking arm, says many US buyers are momentum investors" - buying for the short terro.

With its deeper research base and less.

risk-averse investors, Nasdaq remains a key market for young technology-based companies

He says Irish and European fund managers tend to hold stock, which belps to stabilise the share price. Mr Keatinge points to the example of Iona Technologies, a campus company spawned from Dublin's Trin-

ity College. It was listed at \$24. It dipped to \$19. After the dual listing, the price is back up at around \$35," he says. Mr Keatinge says unlike Israel, where there would be

about 30 IPOs on Nasdaq a year, Irish entrepreneurs have traditionally been reluctant to part with

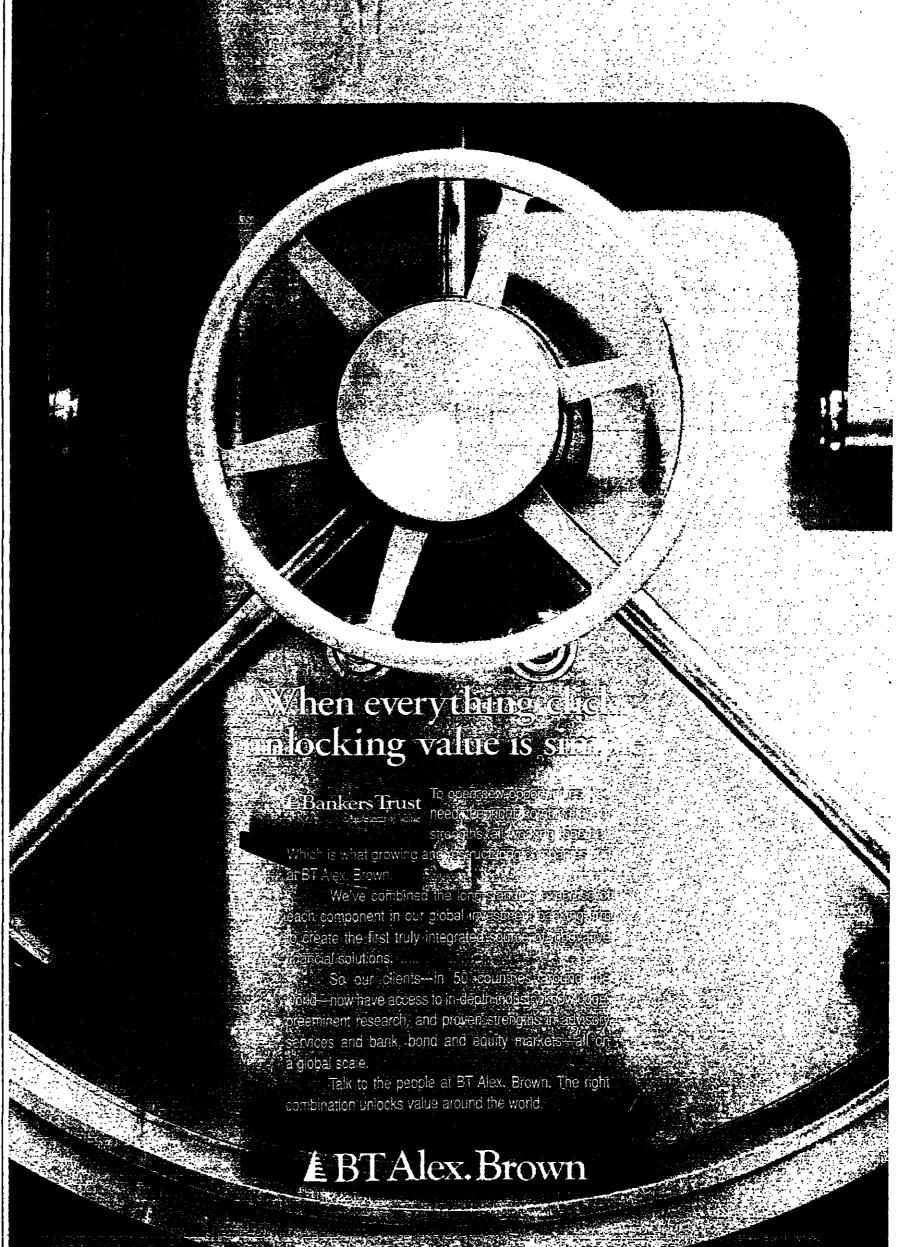

e says given the cost of listing, it probably does not make sense for any company with a turnover of less than \$50m.

IBI estimates that, as a spin-off from the dramatic increase in the US and multinational presence in the software market in Ireland, there are now around 300 homegrown companies - 50 of which are big enough to

go public. IBI would seek to identify the companies, while DLJ handles the technical aspects of the listing. Fees

would be split Says Mr Keatinge: "The idea is that we are on the ground. We know the companies and we can do the donkey work." But the strategy for IBI is

also defensive - reflecting the concern that unless it moves to counter the growing threat of US investment banks hawking their wares directly, it could get cut out altogether from this lucrative stream of commission

### Philip **Services** to sell metals activities

Philip Services has put on the block all its scrap-metal operations, which accounted for more than 60 per cent of 1997 revenues.

While the troubled Canadian recycling and waste management group said the sale would help it pay down substantially its US\$1.1bn debt and restructure its credit facility, analysts said the move was little more than an attempt to appease creditors and investors.

The company said it had engaged Salomon Smith Barney to help sell operations in Canada, the US and the UK. Philip did not identify buyers for its metals division and industry observers suggested few would be interested in the low-margin operations. "It's not going to be easy to sell the scrap division and if they do, it won't make much of a dent in the debt," said James Shrolla, an investment adviser at Canaccord Capital.

Troubles in the metals division contributed to a US\$95.8m loss in 1997, as well as an unexpected firstquarter net loss of US\$565.000. Felix Pardo, recently appointed chief executive, said the sale would also eliminate expo-sure to commodity price risk and cut working capital

Philip said the sale would amount to a shift back to its core waste management business. The company grew quickly in recent years through acquisitions that enabled it to become one of the top waste management groups in North America. with 1997 revenues of more than US\$1.75bn. It spent US\$1.3bn to acquire 30 small companies in 1997.

It was a stock market dar ling until investor confidence was shaken by revelations that it had suffered trading losses in its copper division and that it had not been able quickly enough to implement cost-cutting measures to achieve efficiencies from new operations.

Its fortunes began to became involved in a takeover battle that was won by

#### **TELECOMMUNICATIONS**

### Newbridge Networks sees shares fall on C\$18m loss

Shares of Newbridge Networks fell 5 per cent yesterday from C\$41.80 to C\$39.30 - after the Canadian telecommunications networking equipment maker reported a C\$18m (US\$12.4m) net loss for the year ended April 30 and announced a senior management change in an attempt to restore the company's financial health. The loss, equivalent to 10 cents a share, compares with earnings last year of C\$157m, or 92 cents. In the fourth quarter, net earnings were C\$3.6m, or 2 cents a share, reflecting a one-off C\$26m writedown on R&D costs at its Radnet subsidiary. Earnings before the charge fell 52 per cent to C\$32m, or 18 cents a share, from C\$67m, or 39 cents.

The results were in line with analysts' expectations following a 73 per cent fall in earnings in the third quarter. Newbridge is struggling to bolster sales of its new-generation asynchronous transfer mode (ATM) equipment, in an attempt to offset declining sales of its older products. Terence Matthews, chief executive, said the past year had been challenging for the company but added the ATM market was extremely robust.

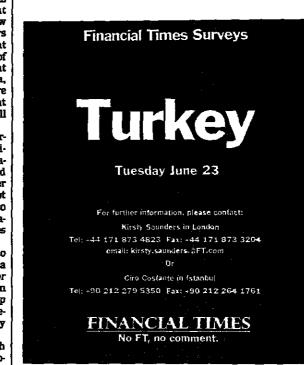

Alan Lutz, formerly of Compaq Computers, Unisys and Northern Telecom, was appointed president and chief operating officer, replacing Peter Charbonneau, who was named vice-chalrman, Scott Morrison, Toronto

#### COMPUTERS

### **Tech Data advances 27%**

Tech Data, the US group which became Europe's largest computer distributor in April after the purchase of Computer 2000 of Germany, yesterday reported a 27 per cent rise in its first-quarter net income to \$23.1m. The group, which distributes computers to resellers, which add software and peripherals before supplying them to the corporate market, increased earnings by 12 per cent to 46 cents a share, in line with analysts' forecasts. Revenues jumped by more than 50 per cent to \$2.2bn, reflecting the initial first-quarter contribution from Macrotron, another large German distributor, purchased last

International sales more than doubled in the three months to April 30, and accounted for 28 per cent of group revenues. Analysts expect this to rise to almost 40 per cent after the Computer 2000 acquisition. Domestic sales were also strong during the quarter, rising by a third. Computer peripherals saw sales rise 71 per cent, while computer systems turnover grew by more than half. Christopher Price, San Francisco

### Hyundai halts production of chips to ease glut

Hyunda: Electronics has temporarily stopped making computer memory chips to help ease a global glut and shore

up falling chip prices. The move was expected to be followed by Samsung Electronics and LG Semicon. The three South Korean companies

supply 40 per cent of the world's D-Ram memory chips. Hyundal said its plant outside Seoul would remain idle until Tuesday. The company normally produces 19m 16-megabit D-Ram chips and 8m 64-megabit D-Ram chips a month, or 10 per cent of the world supply.

"We hope that our decision will encourage other chipmakers around the world to follow suit," Hyundai said. Samsung Electronics, the world's largest chipmaker, said it was also considering cutting production, LG Semicon too has cutback plans but refused to disclose details. AP-DJ. Seoul

**SECURITIES** 

#### Softbank in on-line venture

Softbank, Japan's largest software distributor, is to offer an on-line securities trading service in Japan through a joint venture with E-trade, the US internet brokerage group. The joint venture company, to be established later this month, is expected to begin operations in 1999.

Softbank would hold 58 per cent equity stake and E-trade 42 per cent in the joint venture, which would be capitalised at Y2.7bn (\$19m), the company said.

The merger is the latest in a senes of acquisitions for Softbank, which acquired MAC, the Japanese asset management company last month, and Ziff-Davis, the US information technology group, in 1996. Last year, non-consolidated net earnings at Softbank rose 12.3 per cent, from Y23.1bn to Y26.3bn, on sales up 4 per cent to Y205bn.

The timing of the new company's entry into the market would allow it to benefit from Big Bang financial reforms to deregulate commissions on sales of securities scheduled to take effect next year, analysts said. In the current year, the merger appears unlikely to affect profitability. Softbank shares closed down 1.9 per cent, or Y100, at Y5,220, in a falling market. Alexandra Harney, Tokyo

TELECOMMUNICATIONS

### NTT plans Docomo listing

The president of NTT, Japan's largest telecommunications group, indicated yesterday that Docomo, its cellular phone subsidiary, was likely to be listed on the stock market within the year and expressed hopes that the government would

release its 65 per cent holding in NTT within the same period. Junichiro Miyazu confirmed NTT was looking to conclude Docomo's IPO this year. The cellular phone company, which is the largest in the country, has been a big profits generator for NTT, which has suffered from a downturn in its traditional fixed-line businesses. ### Announcement regarding:

- · Results of the general meeting;
- Stock Exchange listing;
- · Surrender of existing documents of title and
- Termination of the company's listing on the London Stock Exchange ("LSE")

### 1. Results of the General Meeting

Further to the announcement published on 15 March 1998, Capital Alliance Bank Limited is authorised to announce that, at the GFP general meeting of shareholders held on Friday, 29 May 1998, the requisite majority of shareholders approved, inter alia, the special resolutions and ordinary resolutions required to give effect to:

- the increase in the authorised ordinary share capital of the company by the creation of 88 000 000 ordinary shares of
- the share split by subdividing, on the record date Friday, 5 June 1998, each ordinary share in the company of 2,5 cents each into 5 new ordinary shares of 0,5 cents each ("new shares") ("the share split");
- the acquisition by the company of the entire property portfolio of Consolidated African Mines Limited ("CAM") for an aggregate purchase consideration of R84,5 million, which consideration will be settled by way of a R20.5 million payment in cash and the balance through the issue of 35 555 556 new shares ("the acquisition");
- the acquisition by the company of 5 555 556 ordinary shares in Capital Alliance Holdings Limited ("Capital Alliance") from CAM at R27 per share with a total value of R150 million, in consideration for which the company will issue 83 333 333 new shares and the subsequent placing of such Capital Alliance shares with certain financial institutions at R27 per share in order to recapitalise the company ("the recapitalisation") and
- a change in the name of the company from GFP to Mawenzi Resources Limited ("the change of name")

### 2. Stock Exchange Listing

The Johannesburg Stock Exchange ("the JSE") has agreed, with effect from the commencement of trading on Monday. 8 June 1998, to amend the listing of the company's shares to reflect the change of name. Accordingly, shares in the company will trade under the abbreviated name "Mawenzi" in the Financial - "Property" sector of the JSE list from

Furthermore, the JSE has granted a listing in respect of the 118 888 889 new shares to be issued in terms of the acquisition and the recapitalisation from the commencement of trading on Monday, 8 June 1998. Consequently, the aggregate number of issued new shares in the share capital of Mawenzi subsequent to the share split, the acquisition and the recapitalisation will total 170 010 639.

### 3. Surrender of Existing Documents of Title

As a consequence of the aforementioned share split and the change of name, all existing documents of title will cease to be good for delivery for transactions entered into on the JSE from the commencement of trading on Monday, 8 June 1998.

A copy of this announcement together with a form of surrender will be posted to each of the shareholders of the company on or as soon as possible after Wednesday, 3 June 1998. All existing share certificates received by the transfer secretaries and the London secretaries on or before Wednesday, 3 June 1998, will be processed and the new share certificates reflecting the share split and the change of name will be posted to shareholders of the company, at their own risk, by registered post in South Africa and first class post in the United Kingdom, on Monday, 8 June 1998. All existing share certificates received after Wednesday, 3 June 1998 will be processed and the new share certificates will be posted within 5 (five) business days of receipt.

Only new share certificates will be good for delivery on the JSE from the commencement of trading on Monday, 8 June 1998.

### 4. Tempination of the Company's Listing on the LSE

The LSE has agreed to remninate the listing of the company's shares with effect from the close of trading on Friday, 5 June 1998. All documents of title in respect of the company's shares will cease to be of any further force or effect, or good for delivery on the LSE after Friday, 5 June 1998.

In addition to the termination of the company's listing on the LSE, the over-the-counter trading mechanism on the Paris Bourse will also be terminated with effect from the close of business on Friday, 5 June 1998.

## Telco hit by sector slowdown

Profits at Tata Engineering and Locomotive, India's biggest truck and car manufacturer, fell 67 per cent last year, confirming fears that India's vehicle industry is suffering a slowdown. Telco said the latest fig-

ures for April showed the downturn had worsened further this year. Sales of medium and heavy commercial vehicles fell 72 per cent in April, while light commercial vehicles were down 17 per cent.

India's budget, announced on Monday, contained more bad news for Telco. Higher import tariffs on steel, higher excise duties on util-

ity vehicles and a petrol tax are likely to hit profits. The company's future will

depend more than ever on the success of its new small car - recently unveiled at the Geneva motor show. Analysts say that if this gamble fails, Telco will be in deep trouble.

Some analysts say, however, that while India's small-car sector is less congested than the mid-range segment, Telco will still face competition from Hyundai. Daewoo and Fiat, as well as from the industry leader, Maruti, a joint venture between the government and

Suzuki. It is an outrageous waste of shareholders' money,"

said the head of research at share. Sales of heavy comone foreign investment bank mercial vehicles fell 43 per in Bombay. He said the small-car sec-

tor also faced a slowdown, flerce competition and pricecutting.
In the year to March 31, Telco's pre-tax profits fell

from Rs10bn to Rs3.3bn (\$79m), on sales down 27 per cent at Rs73bn. Telco blamed the slump on poor demand for freight, which depressed its core

truck business. Lower freight rates, conpled with higher input costs. severely affected the profitability of truck operators,

vehicle purchases," it said.

cent, against an industry average of 39 per cent, by 43 per cent against 38 pe cent, and light commercial vehicles by 26 per cent against 24 per cent.

The company was forced to cut production to reduce inventories. Tough control of expenses held costs at Rs65hn, down 25 per cent. Telco was also squeezed by

the costs incurred in modernising its plants and expanding into utility vehicles and passenger cars Interest costs rose 26 per causing them to postpone cent to Rs2.7bn, while depre ciation was up 24 per cent at Telco also lost market Rs2.6bn.

## UEM plans to sell 20% of Plus

### in Kasia Luarpur

UEM, the Malaysian toll-road operator, is finalising the sale of about 20 per cent of its wholly owned Plus subsidiary to cut debt. estimated to stand at around M\$3.6bn (US\$922m).

Ramli Mohamad, manag-ing director, said: "We are committed to dispose of some assets to reduce our level of indebtedness." He declined to say exactly how many shares would be sold, at what price, or to whom. Details are expected within about a month.

ted UEM to restructure after it was forced to borrow M\$2.4bn to buy a 32.6 per cent stake in Renong, its ailing parent.

That's when it got difficult," said Ben Chan, research manager at SG Securities. Before that, he said, UEM's debt was linked to

specific projects, and therefore managed by sufficient cash flow. itors had indicated they would refinance its borrowings if the company could

Analysts have long expec-and HEM to restructure after to raise that amount," he said. The company wants to do that without losing control of Plus, which generates cash through its toll operations. Despite Plus's contribution

### NFC to buy back 25% of its equity

NFC, the logistics group that has raised more than £250m from disposals in the last 12 months, is to buy back a quarter of its equity in a deal that will return £307m (\$503m) to shareholders.

The buy-back will leave NFC with gearing of about 80 per cent by the year-end, and excludes the possibility of it making large acquisi tions in the near future. Gerry Murphy, chief executive, said the buy-back offered better value to share-

holders than a large deal could have done. "We didn't see there was good value to be had in the market for a big acquisition because ces are just too high," he

The group intends to seek "bolt-on" purchases in Europe and North America, which it believes will create more value.

The buy-back was welcomed by analysts, and the shares rose 2½p to 182p. However, there was a sting in the tail from NFC. The company said would reduce its dividends following the pay-out, disappointing ana-

lysts who had expected them to be maintained. The interim payment has been cut by 20 per cent to 2p. Together with a forecast final dividend of 3p, that would make 5p for the year against 7.1p in the year to last September.

Mr Murphy said the change would leave the dividend more than twice covered - against 1.4 times last year - and bring the shares down to a market yield. producer in Europe," he to cut operating costs, and Interim earnings per share now realises it needs to do increased from 4.3p to 4.4p.
"We don't feel NFC should more - such as projects to

be a yield stock, especially with a highly geared balance sheet, and we have said for some time we wanted earnings cover of about two times," he said.

Under the terms of the buy-back, shareholders will receive 1760 in cash or loan notes and three new shares in exchange for every four shares held.

NFC expects to complete the buy-back by the end of September. The company also

consultancy, says BS "has by 6.2 per cent this year to 138m tonnes, after a 12.9 per from £53.3m to £59.4m for Battery and Mitsubishi bishi Group, will have 20 per the six months to March 31, Materials. The venture is set-cent and supply raw matericent increase last year. Tim Bennett at Morgan Stanley the six months to March 31. Dean Witter says: "Right on turnover 5 per cent lower at £1.1bn. Excluding disposals and the impact of a stronger sterling exchange rate, the underlying rate of sales growth was 5 per

### COMMENT

**NFC** 

There is a rather sad symme try about NFC's share buy. back. In late 1993 it raised Stare once reining to the £263m in a rights issue. vaguely aimed at expansion. As it turned out, the transport group needed an axe rather than an infusion. Now it plans to spend more than £300m reining in its equity. It is to be hoped that this marks the end of a long and painful turnround by a "new" management that has been in place for three years. The nuts and bolts of the buy-back decision cannot be

Entobre, Helville,

The second secon

faulted. Disposals had left the group with nearly £50m net cash. It tried and failed to find attractively priced acquisitions - so, copybook-style, it is returning cash to shareholders. The exercise could enhance earnings per share by as much as 8 per cent. Forecasts for the year to September 1999 have been pushed up to about 15p on pre-tax profits of roughly £115m. But the buy-back clearly does not address the question of the group's growth prospects in threadbare markets. Most distributors remain caught between their own rabid competitiveness and the parsimony of their big customers. They ought to consolidate but their mighty clients demand dedicated facilities and can abort contracts if control changes. A company like Hays has kept growing by offering more sophisticated services and expanding on the continent. NFC says it still has the capacity for such investment. Investors must pray that is true.

Yesterday's 11 per cent rise in RJB Mining's shares is a depressing omen for UK consumers. Notwithstanding the government's supposed commitment to market forces, the consumer and the environment, a cosy deal on coal is looking ever more likely. If the moratorium on new gas-fired power stations is extended for perhaps five years, it will buttress National Power and PowerGen's ability to set the pool price of electricity. Consumers would be partly compensated for this rigging of the market if the generators' dominance were reduced through the mooted sale of some capacity. This would mean swapping one lot of new entrants into the market, the gas-fired generators, for another, those buying existing plants from the big generators. This may save UK coal for a while, but it is a poor way of introducing greater competition into the generation market.

# Treasuries lead prices downward

**GOVERNMENT BONDS** By Jeremy Grant in London and John Labate in New York

Markets were muted yesterday as major currencies faltered against the yen. share markets moved higher and there were few economic data releases to brighten up a spell of dull trading.

European bonds fell largely in sympathy with weakness in US Treasuries. but there was scarcely any news, particularly on emerging markets, to shift prices. Economists said underlying sentiment was still strong but persistent talk of possible support for the yen helped reduce interest in US

The US said this week current view of the dollar/ yield up to 5.815 per cent.

cerns about yen weakness. "It seems as though the

heat's turning up a bit and we're getting some comments that are a little more yen-friendly, so the appetite for Treasuries near-term is not too great," said James Mitchell, at Nomura. In addition, traders noted

that upward movement in Treasuries might be limited in the short term as the marseen as the key level. US TREASURIES fell in

quiet trading, with little economic news to spur prices. By early afternoon the benchmark 30-year bond was there was no change in its down is to 10411, sending the

5.550 per cent. "One thing that drove prices higher late last week and early this week were problems overseas. It made the market look like a safe haven," said Kevin Logan, at Dresdner Kleinwort Benson. "A lot of that has dissipated in the past day or two."

The week's most keenly ket tested resistance to awaited report, of May lower yields on the 30-year employment data, will be long bond, with 5.75 per cent released tomorrow. "There's a general expectation that job growth will slow in the May report," said Mr Logan. The May employment data

for the shares.

By Jeremy Grant

Debt markets yesterday saw the first transaction involving the securitisation of value added tax rebates with the launch of a \$100m borrowing by Dublin-based Meridian VAT Reclaim.

The company is an agent for corporate clients in the recovery of VAT incurred in the UK, France, Germany and the Netherlands. The three-year financing

structure, arranged and pritately placed by Greenwich NatWest, will form part of a prepayment facility that will allow Meridian to pre-pay VAT refunds against claims due from VAT authorities. The facility carried a cou-

pon linked to Libor. Previously, Meridian has repaid VAT rebate claims to clients once the funds have been received, a process that bok up to nine months. All customers will now sgn a prepayment facility

with Meridian, which will assess VAT claims and pass tlem to the special purpose The company, established ir 1991, is the world's largest

VAT recovery organisation. Stuart Lammin, associate director at Greenwich Nat-Wist, said securitisation of VAT receivables had not because of the small size of companies involved in the VA? refund business.

"No one has been big enough to do it. If you look at Meridian, it's five to six years old. You need a track record to convince the rating agencies to get it secured. All that takes time."

He said the securitisation was aimed at building up Meridian's client base rather than balance sheet restructlaunch IPO Jenoptik has forecast sales this year of more than DM3bn and profits of about East German industry is making a rare appearance on the Frankfut Stock

back Y1.375 to Y137.47 dur- and will continue so for the Questions over next week's ing trading in Europe - but meeting of the Group of it recovered somewhat on next week or so," said Jim. O'Neill, at Goldman Sachs. Seven leading industrial profit-taking to end the day Analysts remained undecided whether the G7 meet-The D-Mark rose on hopes ing would lead to intervenof an international aid packrecent rise in the yen had economy. Relatively high taken some of the heat out of the situation. However, bill auctions also signalled they pointed out that the market position supported the dollar.

"The market is very nervous

tion of the rouble was looking less likely. The dol-lar fell almost 1 pfennig "At some stage [intervention] is inevitable," said Mr O'Neill. "But there are two problems from a US perspective. Firstly, until the Japa-nese economy looks better, if the US came in and it sucblamed for the fall in the ceeded, it could only succeed by hurting the US.

Secondly, the US feels that they have got Japan in a bit of a corner and there is a genuine chance that there will be real significant policy change after the upper house

# pressure on oil prices

MARKETS REPORT

Oil prices came under renewed pressure yesterday following very bearish data from the American Petroleum Institute and the US Department of Energy, both reporting large inventory builds in primary diesel, heating oil and jet fuel.

Although stocks of crude oil dropped last week by 1.98m barrels to 347.5m barrels, according to the API, this is still some 24m barrels above last year's level. US gasoline stocks are now 216m barrels.

On the International Petroleum Exchange, Brent blend for July slid 24 cents to \$13.90 a barrel at one point, but in later trading recovered to \$14.02.

The Baltic Freight Index. the barometer for the world's dry cargo freight rates, slumped to an 11-year low yesterday, to 918 points. The fundamental factor behind the slide, which began in February, is the conomic slowdown in parts of south-east Asia, combined with a significant increase in the world's shipping fleet. SSY Futures, the freight

brokers, points out that in the Panamax sector (covering ships of 50,000 to 80,000 tonnes) time-charter revenues have collapsed from an average of \$9,834 in 1997 to \$7,200 so far this year; the current spot rate is even ower, at \$6,450.

Palladium was "fixed" in London at \$261 a troy ounce, down from Tuesday's \$273 and the lowest since March

The weakening price was seen as a response to reports that some supplies of Russian palladium sponge - the form in which the precious metal exists prior to being \$1,780 a tonne, \$14 higher.

reaching Japanese electronics manufacturers.

Palladium supplies from Russia, which produces 60-70 per cent of world output. have been interrupted by bureaucratic problems.

tion that the Russians are living from hand-to-mouth or that Norilsk [the Russian mine) is adopting different selling arrangements," said

Base metals upwards on the London Metal Exchange: threemonth copper closed at \$1.705 a tonne. up \$43. although traders still felt the market to be weak, particu-

down approaches. Tin. however, strongly, to \$5,900 at one stage, a new 41/2-year high. The three-month price closed at \$5,980 a tonne, up \$150 on Tuesday's close. Specialists pointed to persistent low stock levels and looming supply tightness as being

larly as the summer slow-

behind the bullish mood. On Liffe, coffee futures continued to climb amid moderate volumes, with the day's total being 4,245 lots. The July contract finished at

### Interest rate optimism triggers rally in shares

MARKET REPORT By Steve Thomoson. UK Stock Warket Editor

Evidence of a slowdown in yesterday. Wall Street was UK services, an area said to only modestly lower overhave been causing inflationary concerns at the Bank of England, provided a muchneeded boost to London's equity market yesterday.

The Chartered Institute of Purchasing and Supply survey was interpreted by the market as virtually dispelling any lingering worries that UK interest rates might farm payroll report. be increased by the Bank's

announced at midday today. There were other reasons for the return of confidence

night and most Asian markets delivered comforting performances, especially Hong Kong, which rallied 2.5 per cent. And US stocks made mod-

est progress at the start of trading in New York yesterday, shrugging aside worries about tomorrow's May non-

> Richard Lake, chartist at Brewin Dolphin, the broker, said: "My short-term target area of 5,500 to 5,700 for the FTSE 100 is becoming much more likely. Wall Street turned bearish last week."

Turnover in equities expanded again, reaching 920m shares at 6pm, boosted by big technical activity in Shell and after ABN Amro moved into the stock market to buy Courtaulds shares on behalf of bidder Akzo Nobel.

### Bid buzz drives

**COMPANIES REPORT** By Martin Brice and Peter John

Furniture retailer MFI saw heavy trade of 7m shares as a story went the rounds that Ikea, the Swedish furniture store, was running its slide rule over the company. The talk helped MFI to become one of the better FTSE 250 performers, the stock rising 51 to 871 ap.

The tale marked a change from the old chestnut of a bid from Kingfisher, down 9 at £10.80 in 2.3m traded. Analysts said Ikea, a privately owned company started 55 years ago with a current worth estimated at about £5bn, would acquire retail space by purchasing MFI. but they questioned whether it would also want the man ufacturing capacity that MF

possessed. One analyst said: "On the other hand, it may be the best way of realising some value for MFI shareholder at this stage in the cycle." Turnover in London wa boosted by very heavy vo

ume in Shell Transport. One block of 45m shares went through the electronic ticker just after 2pm at 449p a share and led to final volume of 55m shares.

Some confusion ensued over the origin of the trade.

The fact that it was marked at a couple of pennies above the best spread and yet did not affect the underlying share price suggested it might have been a wrongly

printed trade. However, the stock exchange said the trade was correctly carried out at a realistic price and represented an equity swap, initially booked in dollars.

It is believed the trade repented one side of a stock result in a permanent change in ownership.

The shares ended the day flat at 4474p with pressure bid battle began. from slightly discouraging

American Petroleum Institute data and a fire at one of its Rotterdam refineries. API figures showed a rise in gasoline stocks and analysts said they should have been lower because of the

increase in driving seen dur-

ing the summer. The data had more of an impact on BP, which is more geared to the underlying oil price and which ended a net 512 lower at 8821/2p.

Courtaulds fell sharply in lending deal that will not spite of some very heavy buying as the market decided that the white flag had been raised before the

Best and worst performing FTSE sectors

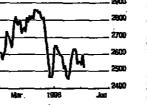

it had terminated discussions with DLJ Merchant Banking Partners regarding a possible joint offer for Courtaulds. It has reached agreement with Akzo of the Netherlands to acquire, for £175m, the coatings businesses of Courtaulds, subject to Akzo's offer succeeding.

It was assumed by many analysts that Akzo would succeed in its 450p a share offer for Courtaulds. After the market closed Courtaulds said Akzo had bought 40.6m shares - just under 10 per cent - at 448p a share through SBC Warburg Dillon Read.

However, there were dissenting voices. One broker said that, unless the bid went unconditional next week, it still had another five weeks to run and the game was not over. Courtaulds slipped 211/4 to 444p. Growing institutional investor interest in information technology stocks was

highlighted by a series of

erage of the sector. The strongest rise of the day in the FTSE 350 was achieved by software and

services group CMG, said to be helped by strong buying in early trading on the the stock is also listed. The shares rose 9.5 per

cent. or 165, to £19.05 where they stood at about 78 times this year's forecast earnings. Morgan Stanley Dean Witter yesterday initiated coverage of the company, and attached a price target of £25 to the shares.

However, not all analysts were so bullish on the stock. with Graham Brown at Sutherlands easing his stance on the company from "longterm buy" to "hold" following recent outperformance by the shares.

He said the shares, which on Friday went through a 1-for-1 split, had stood at the equivalent of £14.45 on the day of an analysts' visit to the company 13 trading days ago.

Fi Group falls

Merrill Lynch this week inipositive broker comments as analysts increased their covtiated coverage of FI Group with a "buy" note that said earnings growth at the IT the next two years. The shares were off 5 at 687%p. where they stood at 30 times this year's earnings.

Axel Springer of Germany. However, rival Daily Mail Trust moved forwards along

with WPP, the marketing services group. Institutions were buying on anticipation that the two companies would go into the Footsie after next week's review. Daily Mail 'A' shares rose 35 to £31.70 and WPP gained

10¼ to 423½p. J Mowlem was up 2 at 133%p after Merrill Lynch initiated coverage of the company with a strongly positive note called "Hot Stuff". The 12-page research gave a 222p sum-of-the-parts

valuation for the shares. Mark Hake at the broker said: "There is tremendous value in this business." The 222p-a-share valuation contained 53p for the company's stake in SGB and 17p for the cash in the business.

The first day of trading in Game saw it rise from the placing price of 200n to 290n. giving the computer games retailer a market capitalise tion of £170m.

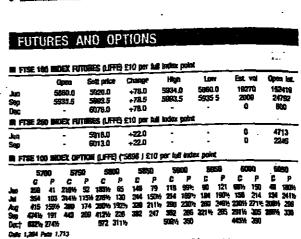

Shares in Heal's, the department store, were up 1% at 178p after posting underlying interim results up 31 per cent to £2.2m.

SmithKline Beecham closed 1314 higher at 65514p. Sutherlands told clients the stock had suffered an undeserved 15 per cent underperformance against the FTSE All-Share.

Venture capital group 3i dominated the performance in the FTSE 100 with a rise of 34% to 650p prompted by selected buying in the tightly traded stock before data today.

BAT Industries rallied after recent weakness with services and contracting investors responding to group were forecast to strength in Zurich, which is exceed 40 per cent during merging with BAT. The shares ended the day 281/4 higher at 5814p on heavy turnover of 13m.

Lloyds TSB improved 41/2 Mirror Group shed 101/2 to to 8911/4p as the market came 233p as investors fretted at round to the idea that recent one-off provisions rather than a fundamental down

### Danish package weakens shares

Investors in Danish equities have been bounced from one uncertainty to another this

general election in March was followed in May by an 11-day strike that paralysed industry and transport. Then came last week's referendum on the Amsterdam treaty and, finally, this Tuesday, an important package of economic measures from the government.

The financial markets have taken these events with considerable equanimity although Denmark's Nationalbank (central bank) temporarily raised shortterm instrumental interest rates during the strike, when there was some selling of the

trunner, rising 4.2 per cent to BFr2,865. UCB added 2.5 In the share market, there was a brief bout of buying on Friday to celebrate the expected approval of the by heavyweight Astra's Amsterdam treaty, but the spree petered out quickly

index managed to limit its and left the all-share index decline to 1.21 to end at slightly lower on the day. 3,624.49. Astra lost SKr3 to Tuesday's economic pack-SKr153.50 on fears of losses age, which is daunting in its complexity, appeared to baffle the market at first, but yesterday there was a reaction, with the benchmark index falling 1.4 per cent to

232.13. This left the all-share index about 6.5 per cent SKr142. The forestry index down from its April high of 778.84, but still some 8 per cent ahead since the start of Tuesday's proposals have

two implications for equities: first, the government proposes a reduction in the corporate income tax rate from 34 to 26 per cent in two stages - from 34 to 30 per cent in 1999 and from 30 to 26 per cent in 2000; second, that the government erases the incentive for using an individual tax-advantaged pension savings scheme.

To date, share investments under this scheme have not been taxed on the annual vield. This generated a lively interest in equity investment among small savers. The government has now pro

### Russia's wees were highlighted when the central Tech stocks gain after

\$7bn deal

#### **AMERICAS**

Wall Street had a calm. though positive session, with investors returning to technology shares, writes John Labate in New York.

The tone of trading was positive as investors examined Tellabs' \$7.1bn takeover of Ciena, the fibre optic equipment producer. Ciena surged \$11. a rise of more than 7 per cent, to \$611. while Tellabs fell \$21 to \$63<sup>1</sup>4. The announcement sent many other communications shares higher on specu-

lation of more deals to come. Cisco Systems, the leading networking product maker. rose \$12 to \$77% on rumours that the company had considered a takeover of Ciena

Other networking shares were bid higher, including Bay Networks, which had been considered a takeover candidate. Bay rose \$% to \$28%. 3Com surged more than 8 per cent or \$1% to

Enthusiasm for communication stocks did not rub off on the general market, however, which continued to trade in a cautious range. By early afternoon the Dow Jones Industrial Aver-

age was 4.23 higher at 8.895.47 while the broader Standard & Poor's 500 index gained 1.84 to 1.095.06. Strength in the networking sector belped keep tech shares climbing. The Nasdaq composite was 9.90 higher at 1.771.69. Semiconductor stocks were mostly higher. with Intel up \$0, to \$69% and

Texas instruments \$1, to

\$50 is. Dell Computer rose

\$2° to \$85°, while Gateway

2000 gained \$2 or 4.75 per

cent to \$467 s.

US Treasuries did little to help the stock market with bond prices falling back as the dollar slipped against the

Traders await the week's most important economic report, tomorrow's labour report for May Payroll growth is expected to slow. but analysts will have their eyes on the wage figure for early signs of inflation pres-

sures. By early afternoon the benchmark long bond was down is to 10411, sending the yield up to 5.815 per cent.

Higher interest rates did little to help financial stocks. Chase Manhattan fell \$14 to \$136! while BankAmerica was off \$4 to \$8112.

Dow components were mixed although a few stocks had big gains. General Motors was \$21/4 higher to \$75% while AT&T climbed \$11/2 to \$604. But Sears Roebuck, the retailer, was down \$1 to \$61%.

TORONTO made modest headway in early trading with the 300 composite index up 1.59 at 7,535.60 at noon. Golds tracked the bullion price upwards but initial gains were pared. Placer Dome added 10 cents to C\$17.85 but Barrick softened

15 cents to C\$27.45. Among other heavyweight sectors, banks were mixed. Royal Bank of Canada improved 35 cents to C\$89.65 while Bank of Nova Scotia came off 30 cents at C\$38.45.

Newbridge Networks' results statement sparked a wave of selling and the shares lost C\$2.75 at C\$39.15. News that Northern Telecom had taken a 9 per cent stake sent Plaintree Systems shooting ahead by C\$1.10 to

1.6 per cent at 9,984.

Eletrobras was among the heaviest casualties, sliding almost 6 per cent to R\$39.50. Telebrás came off 1.3 per cent to R\$125.30 and Petrobrás 0.4 per cent at R\$238.

emerging markets.

MILAN firmed thanks to

com Italia added L202 to L13,540 ahead of its board Pirelli rose L106 to L6,007 as investors regarded the share price undervalued compared with other cable and optic equipment makers.

BRUSSELS closed at its third consecutive high, thanks to low long-term interest rates. The Bel-20 index rose 17.33, or 0.6 per cent, to 3.280.35.

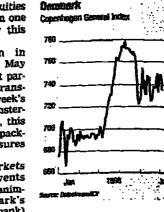

Generale Bank rose BFr175 to BFr27.150 while Fortis.

on increased parallel imports to Sweden. Stora, which announced a merger with Enso of Finland to create the world's largest paper and pulp company, resumed trading and closed up SKr15 to

gained 3.2 per cent. MOSCOW continued to rally strongly and the sentiment upturn for Russian equities spilled over on to a number of other east European stock markets.

BUDAPEST ended 538.15 7.5 per cent higher at 7.718.28 on the Bux index, while in WARSAW the Wig 20 index gained 80.9 to 1.587.5, a rise of 5.4 per cent. In Moscow, the RTS index put on 16.32 to 209.07 for a two-day advance of almost 25 per cent as mounting hopes for a support package from G7 nations allowed money markets to subside.

Written and edited by Jeffrey Brown, Emiko Terazono and Peter Hall

posed a tax of 10 per cent on the yield on these equity investments.

At the same time it has reduced the tax advantage of the scheme to the point where future savers may decide the scheme has no point, say tax specialists. The effect of the two

changes is to shift the tax burden from companies to individual investors. The net effect, says Mr Morten Lynge, chief equities dealer at Den Danske Bank, will be slight, but he predicted that the change would alter the structure of equity ownership to some extent.

"The foreign ownership share will rise and the share owned by individual Danes will fall," he says.

Companies with a large tax bill will benefit most from the reduction in corporate income tax, notably the banks. But because value added tax is not paid on financial services, the Danish government decided in the 1980s to penalise the banks with a special wage sum tax. This is now to go up, and will partially counter the reduction in corporate income tax.

ment measures - which were widely welcomed by Danish economists ~ are likely to take some steam
